निष्पादन सुरक्षा PERFORMANCE SECURITY

कार्य निष्पादन सुरक्षा अनुबंध के कुल कार्य आदेश मूल्य का 5% होगी। यह अनुबंध दिए जाने की सूचना के 21 दिनों के भीतर प्रस्तुत की जानी चाहिए और दोष दायित्व अवधि समाप्त होने के बाद जारी की जाएगी।

Performance security shall be 5% of total work order value of the contract. It shall be furnished within 21 days after notification of award and it shall be released after the defect liability period.

प्रदर्शन सुरक्षा, आईआरडीएआई के अंतर्गत बीमा कंपनी द्वारा जारी बीमा गारंटी बांड (आईएसबी), खाताधारक मांग मसौदा, कोच्चि, केरल में शाखा वाले भारत के किसी भी अनुसूचित बैंक द्वारा जारी बैंक गारंटी / स्वीकार्य रूप में ऑनलाइन भुगतान के रूप में प्रस्तुत की जाएगी।

Performance Security shall be furnished in the form of Insurance Surety Bond (ISB) issued from Insurance Company under IRDAI, Account Payee Demand Draft, Bank Guarantee issued from any Scheduled Bank in India having a branch in Kochi, Kerala / on online payment in an acceptable form.

सुरक्षा जमा राशि SECURITY DEPOSIT

कुल सुरक्षा जमा राशि अनुबंध के कुल मूल्य का 5% होगी। यह राशि प्रत्येक चालू खाते के बिल के मूल्य पर 5% (पांच प्रतिशत) की दर से कटौती के माध्यम से तब तक वसूल की जाएगी जब तक कि कुल सुरक्षा जमा राशि प्राप्त न हो जाए, जिसके बाद इस मद पर कोई और कटौती नहीं की जाएगी।

Total security deposit shall be 5% of total contract value. This shall be recovered through deductions at the rate of 5% (Five percentage) of the value of each running account bill till the total security deposit amount is collected, after which no further deductions shall be made on this account.

या OR

सुरक्षा जमा राशि, आईआरडीएआई के अंतर्गत बीमा कंपनी द्वारा जारी बीमा गारंटी बांड (आईएसबी), खाताधारक मांग मसौदा, कोच्चि, केरल में शाखा वाले भारत के किसी भी अनुसूचित बैंक द्वारा जारी बैंक गारंटी / या स्वीकार्य रूप में ऑनलाइन भुगतान के रूप में प्रस्तुत की जाएगी।

Security Deposit shall be furnished in the form of Insurance Surety Bond (ISB) issued from Insurance Company under IRDAI, Account Payee Demand Draft, Bank Guarantee issued from any Scheduled Bank in India having a branch in Kochi, Kerala / on online payment in an acceptable form.

अनुबंध के सभी पहलुओं में पूर्ण होने और अनुबंध के तहत सभी दायित्वों के पूरा होने के बाद, सुरक्षा जमा राशि ठेकेदार को बिना किसी ब्याज के 60 दिनों के भीतर वापस कर दी जाएगी।

Security Deposit shall be refunded not later than 60 days to the contractor without any interest after the completion of contract in all respects and completion of all such obligations under the contract.

परिसमापन हर्जाना LIQUIDATED DAMAGES

यदि ठेकेदार निर्धारित अवधि के भीतर कार्य पूरा करने में विफल रहता है, तो ठेकेदार को विलंब या उसके किसी भाग के लिए अनुबंध मूल्य के ½% (आधा प्रतिशत) प्रति दिन की दर से विलंब शुल्क का भुगतान करना होगा, जो अनुबंध मूल्य के अधिकतम 5% (पांच प्रतिशत) तक सीमित होगा।

In case the contractor fails to complete the work within the stipulated period, contractor shall be liable to pay a LD of ½% (half percent) of the contract value **per day** for the delay or part thereof subject to a maximum of 5% (Five percent) of the contract value

अनुबंध की अवधि PERIOD OF CONTRACT

कार्य आदेश जारी होने की तिथि से अनुबंध की अवधि 1 वर्ष होगी।

The period of the contract shall be 1 Year from the date of issue of work order.

आपूर्ति की गुंजाइश SCOPE OF SUPPLY

सामग्री Materials

a. ठेकेदार का कार्यक्षेत्र Contractor's Scope

यदि आवश्यक हो तो मचान सामग्री (स्टील पाइप और क्लैप) और उसके निर्माण की व्यवस्था ठेकेदार द्वारा की जाएगी (केवल स्टील मचान का ही उपयोग किया जाएगा)।

Scaffolding material (steel pipe & clamps) and its erection if required to be arranged by the contractor (only steel scaffolding shall be used).

ठेकेदार को कार्य के लिए आवश्यक सभी कुशल और अकुशल जनशक्ति उपलब्ध करानी होगी।

Contractor shall supply all skilled & unskilled manpower required for the work.

b. एचओसीएल का कार्यक्षेत्र HOCL'S Scope

एचओसी द्वारा गैस्केट शीट, स्टड और नट, ब्लाइंड फ्लैंज और ट्यूब प्लग आदि निःशुल्क उपलब्ध कराए जाएंगे। ठेकेदार को गैस्केट को आवश्यक आकार में काटने की व्यवस्था स्वयं करनी होगी।

HOCL shall supply Gasket sheet, stud & nuts and blind flanges and tube plugs etc and shall be provided at free of cost. The contractor has to make his own arrangement to cut the gaskets to the required size.

औजार और उपकरण TOOLS & TACKLES

a. ठेकेदार का कार्यक्षेत्र Contractor's Scope

सभी मशीनें, औजार, उपकरण, उठाने के उपकरण जैसे चेन पुली, स्लिंग, D शैक्ल, हाइड्रॉलिक टेस्ट पंप, होज, फिटिंग, कनेक्टर, कैलिब्रेटेड प्रेशर गेज और काम पूरा करने के लिए आवश्यक अन्य उपकरण ठेकेदार द्वारा व्यवस्थित किए जाएंगे।

All machines, tools, tackles, lifting equipment such as chain pulleys, slings, D shackles, Hydraulic test pumps, hoses, fittings, connectors, calibrated pressure gauges and other tools and equipment required for the completion of the work is to be arranged by the contractor

b. एचओसीएल स्कोप HOCL Scope

शून्य Nil

पानी बिजली WATER & POWER

एचओसी एक ही स्थान पर पानी और बिजली की आपूर्ति करेगा।
HOCL will provide water and power at one point.

सामान्य स्थल सफाई GENERAL SITE CLEANING

कार्य स्थल को इंजीनियर/प्रभारी अधिकारी की पूर्ण संतुष्टि के अनुरूप हमेशा साफ-सुथरा रखा जाना चाहिए। कार्य पूर्ण होने पर, सभी सामग्रियों को इंजीनियर/प्रभारी अधिकारी के निर्देशानुसार प्रतिदिन एचओसीएल परिसर में निर्धारित स्थानों पर पहुँचाया जाना चाहिए। बिल जमा करने से पहले सामग्रियों का मिलान अवश्य किया जाना चाहिए।

Working site should always be kept cleaned up to the entire satisfaction of the Engineer/Officer-In-Charge. Upon completion of the work, all materials shall be transported to designated locations in HOCL premises as directed by the Engineer/Officer-In-Charge on daily basis. Material reconciliation has to be carried out before submitting the bill.

पूरा होने का समय TIME OF COMPLETION

चूंकि यह काम तत्काल और एक साथ किया जाना है, इसलिए प्रत्येक एक्सचेंजर के लिए दो अलग-अलग दल/उपकरण और उपकरण की व्यवस्था की जानी है।

Since this work is to be done urgently & simultaneously, two separate Crews/Tools & Tackles are to be arranged for each Exchanger.

यह कार्य या तो किसी भी अल्पकालिक बंदी के दौरान या वार्षिक बंदी अवधि के दौरान किया जाएगा।

The work will be taken up either in any short shutdown or during the annual shutdown period.

एचओसीएल द्वारा ठेकेदार को अल्पकालीन शटडाउन की सूचना एक दिन पहले दी जाएगी। ठेकेदार को सूचना मिलने के 24 घंटे के भीतर प्रत्येक बॉयलर के लिए अलग-अलग टीमें तैनात करनी होंगी। शटडाउन अवधि को कम करने और संयंत्र को पुनः चालू करने के लिए प्रमाणन सहित सभी कार्य सर्वोच्च प्राथमिकता के आधार पर किए जाने चाहिए।

HOCL will inform the party about the short shutdown period one day in advance. The contractor has to mobilize separate team for each boilers within 24 Hrs. from the time of intimation. All activities including certification has to be done under top most priority in order to save shutdown period and put back the plant in service.

संपूर्ण कार्य को कार्य प्रारंभ करने की सूचना की तिथि से 5 दिनों के भीतर पूरा किया जाना चाहिए। हालांकि, यह एक अत्यावश्यक कार्य होने के कारण, ठेकेदार को निर्धारित अवधि से पहले कार्य पूरा करने के लिए हर संभव प्रयास करना होगा (उदाहरण के लिए, श्रमिकों को चौबीसों घंटे/शिफ्ट के आधार पर काम पर लगाना आदि)।

Time of completion for the entire work shall be 5 DAYS from the date of intimation to start the work. However, being an urgent shutdown job, all efforts has to be put by the contractor to complete the job before the stipulated period (eg. putting labourers on round clock / shift basis etc.)

निविदा की वैद्यता VALIDITY OF THE TENDER

निविदा प्राप्त करने के लिए निर्धारित अंतिम तिथि से तीन महीने की अवधि के लिए स्वीकृति के लिए निविदा को मान्य रखा जाएगा।

The tender shall be kept valid for acceptance for a period of **THREE months** from the last date prescribed for receipt of the tender.

एक निविदाकर्ता कंपनी की लिखित सहमति के बिना तीन महीने की उक्त अवधि के दौरान अपनी निविदा को रद्द करने या रद्द करने या निविदा दर या उसकी किसी भी शर्त को बदलने का हकदार नहीं होगा।

A Tenderer shall not be entitled during the said period of three months without the consent in writing of the company to revoke or cancel his tender or to vary the tendered rate or any terms thereof.

मूल्य PRICE

अनुबंध निश्चित सर्व-समावेशी मूल्य पर प्रदान किया जाएगा जब तक कि अन्यथा निर्दिष्ट न हो। निविदा में सभी दरें लागू करों, शुल्कों और शुल्कों को कवर करेंगी। हालांकि, एचओसीएल द्वारा लागू जीएसटी का भुगतान केंद्रीय उत्पाद शुल्क के साथ जीएसटी पंजीकरण वाले सफल निविदाकर्ता के अधीन किया जाएगा।

The Contract will be awarded on fixed all-inclusive price unless otherwise specified. All rates in the tender shall cover applicable taxes, levies and duties. However applicable GST will be paid by HOCL subject to the successful tenderer having GST registration with Central Excise.

मूल्य को आंकड़ों और शब्दों दोनों में उद्धृत किया जाएगा। यदि किसी निविदाकर्ता ने शब्दों और आंकड़ों में दो अलग-अलग कीमतें उद्धृत की हैं, तो दोनों में से कम को वैध और निविदाकर्ता पर बाध्यकारी माना जाएगा।

The price shall be quoted both in figures and words. In case a tenderer has quoted two different prices in words and figures the lower of the two will be considered valid and binding on the tenderer.

भुगतान की शर्तें PAYMENT TERMS

- काक्कनाड के कारखाना एवं बॉयलर निरीक्षक से बॉयलर उपयोग का प्रमाण पत्र प्राप्त करने के बाद कार्य पूर्ण होने पर 95% भुगतान किया जाएगा।
95% Payment will be made on completion of the work after obtaining Certificate for use of Boilers from the Inspector of Factories and Boilers, Kakkanad
- शेष 5% भुगतान को सुरक्षा जमा के रूप में रखा जाएगा और अनुबंध के सभी पहलुओं के पूर्ण होने और अनुबंध के तहत सभी दायित्वों के पूरा होने के बाद इसे जारी किया जाएगा।
Balance 5% payment will be kept as security deposit and it will be released after the completion of contract in all respects & completion of all obligations under the contract.

ठेके की वरीयता CONTRACT PREFERENCE

एमएसएमई / एसएसआई इकाइयों / पीएसयू के लिए लागू अनुबंध / मूल्य वरीयता या कोई अन्य रियायत भारत सरकार के नवीनतम निर्देशों के अनुसार होगी। इस लाभ का लाभ उठाने के लिए, बोली लगाने वाला तकनीकी बोली में ही अपना दावा करेगा और अपनी पात्रता साबित करने के लिए आवश्यक दस्तावेजी साक्ष्य संलग्न करेगा।

Contract / Price Preference or any other concessions applicable for **MSME / SSI Units /PSUs** will be as per latest Government of India Directives. For availing this benefit, the bidder shall make their claim in the Technical Bid itself and enclose necessary documentary evidence to prove their eligibility.

दोष दायित्व अवधि DEFECT LIABILITY PERIOD

ठेकेदार कार्य पूर्ण होने की तिथि से 12 महीने की अवधि के लिए संपूर्ण कार्य की गारंटी देगा।
The contractor shall guarantee the entire work for a period of 12 months from the date of completion of work.

विवादों की मध्यस्था Arbitration of disputes

"इस निविदा/समझौते/खरीद आदेश/कार्य आदेश के तहत या उससे उत्पन्न होने वाले सभी विवादों, मतभेदों, प्रश्नों और दावों को आपसी चर्चा के माध्यम से पार्टियों के बीच सौहार्दपूर्ण ढंग से निपटाया जाएगा और ऐसा न करने पर, ऐसे विवादों, मतभेदों, प्रश्नों या दावों को मध्यस्थता के माध्यम से समाधान के लिए भेजा जाएगा। भारत अंतर्राष्ट्रीय मध्यस्थता केंद्र या एचओसीएल के अध्यक्ष-सह-प्रबंध निदेशक द्वारा नियुक्त एकमात्र मध्यस्थ और मध्यस्थता का पुरस्कार अंतिम और पार्टियों पर बाध्यकारी होगा। मध्यस्थता की सीट कोच्चि, केरल, भारत में होगी और मध्यस्थता की कार्यवाही भारत अंतर्राष्ट्रीय मध्यस्थता केंद्र अधिनियम 2019 / भारतीय मध्यस्थता और सुलह अधिनियम 1996 या किसी वैधानिक संशोधन के अनुसार कोच्चि, केरल, भारत में आयोजित की जाएगी। या

All disputes, differences, questions and claims arising out of, under or touching upon this Tender /Agreement/ Purchase Order/ Work Order shall be settled amicably between the parties through mutual discussion and failing that, such disputes, difference, questions or claims shall be referred for resolution through arbitration to the India International Arbitration Centre or a Sole Arbitrator to be appointed by the Chairman-cum-Managing Director of HOCL and the award of Arbitration shall be final and binding on the parties. The seat of the Arbitration shall be at Kochi, Kerala, India and the proceedings of the arbitration shall be held at Kochi, Kerala, India in accordance with the India International Arbitration Centre Act 2019 /

Indian Arbitration & Conciliation Act 1996 or any statutory modification or re-enactment thereof for the time being in force.

कंपनी के अनुबंध की सामान्य शर्तें अनुबंध पर लागू होती हैं, और अनुबंध का हिस्सा बनती हैं। एचओसीएल के अनुबंध की सामान्य शर्तें को हमारी वेबसाइट www.hoclkochi.com से डाउनलोड किया जा सकता है।

The General Conditions of Contract of the company is applicable to, and forms part of the contract. The General Conditions of Contract of HOCL can be downloaded from our Web site www.hoclkochi.com.

परिशिष्ट जारी करने का अधिकार Right to Issue Addendum

कंपनी निविदा दस्तावेजों में बताई गई किसी भी शर्त, खंड या शर्तों को स्पष्ट/संशोधन/पूरक और/या हटाने के लिए निविदा दस्तावेज में कोई परिशिष्ट जारी करने का अधिकार सुरक्षित रखती है। जारी किए गए प्रत्येक परिशिष्ट को निविदाकर्ता या उसके अधिकृत प्रतिनिधि को वितरित किया जाएगा और ऐसा प्रत्येक परिशिष्ट निविदा दस्तावेजों का हिस्सा बन जाएगा।

The company reserves the right to issue any addendum to the tender document to clarify/amend/supplement and/ or delete any of the conditions, clauses or terms stated in the tender documents. Each addendum issued shall be distributed to the tenderer or his authorized representative and each such addendum shall become part of the tender documents.

अंतिम तिथि और समय: टेंडर जमा करने की अंतिम तिथि (समापन तिथि) 12/02/2026 को दोपहर 02:00 बजे है।

DUE DATE & TIME: Due date for submission of tender is (Closing date) **12/02/2026 at 02.00 PM.**

बोली खोलने की तिथि: बोलियाँ 12/02/2026 को दोपहर 02.30 बजे इलेक्ट्रॉनिक रूप से खोली जाएँगी। तकनीकी रूप से स्वीकार्य बोलीदाताओं को मूल्य बोलियों के खोलने की तिथि और समय के बारे में ईमेल के माध्यम से सूचित किया जाएगा।

OPENING OF BIDS: The Bids will be opened on **12/02/2026 at 02.30 PM** electronically. Technically acceptable bidders will be informed about the date and time of opening of the price bids by emails.

प्रस्ताव की वैधता: प्रस्ताव निविदा के लिए निर्धारित प्रस्तुत करने की अंतिम तिथि से न्यूनतम **90** दिनों की अवधि के लिए वैध होगा।

VALIDITY OF OFFER: Offer shall be valid for a minimum period of 90 days from the last date of submission stipulated for the tender.

बोली को अस्वीकार करने का अधिकार: एचओसीएल किसी भी बोली को अस्वीकार करने का अधिकार सुरक्षित रखता है जैसे (ए) विक्रेता उपरोक्त बोली प्रक्रियाओं का पालन नहीं करता है (बी) विक्रेता एचओसीएल को तकनीकी रूप से स्वीकार्य नहीं है (सी) तकनीकी वाणिज्यिक बोली या ईएमडी के साथ ईएमडी संलग्न नहीं है। भुगतान निर्धारित राशि से कम है (डी) विक्रेता निविदा की सामान्य शर्तों से सहमत नहीं है। (ई) मांगे गए किसी विशेष दस्तावेज को संलग्न नहीं करना (एफ) कोई अन्य वैध कारण।

RIGHT TO REJECT A BID: HOCL reserves the right to reject any bid due to reasons such as (a) Vendor not following above bidding procedures (b) Vendor not being technically acceptable to HOCL (c) Not enclosing EMD with the techno commercial bid or EMD paid being lesser than the stipulated amount (d) Vendor not agreeing with the general conditions of the tender. (e) Not enclosing any particular documents asked for (f) Any other valid reasons.

बोलियों के सभी पृष्ठों पर हस्ताक्षर करना और मुहर लगाना: विक्रेता अपलोड की गई बोलियों के सभी पृष्ठों पर हस्ताक्षर करेगा और मुहर लगाएगा, ऐसा न करने पर बोलियां अस्वीकार कर दी जाएंगी।

SIGNING & STAMPING ON ALL PAGES OF BIDS: The vendor shall sign and stamp on all the pages of the bids uploaded, failing which bids are liable to be rejected.

संलग्नक ANNEXURE-II

काम की गुंजाइश SCOPE OF WORK

कार्यक्षेत्र में निम्नलिखित कार्य शामिल हैं, लेकिन इन्हीं तक सीमित नहीं हैं:

Scope of work includes but not limited to the following:

- इस कार्य में उच्च ऊंचाई पर स्थित हीट एक्सचेंजर ('केटल' प्रकार) को खोलना, उसके खोल और ट्यूब की भौतिक सफाई करना, उसे असेंबल करना और उसका दबाव परीक्षण करना शामिल है।
The job involves disassembly, physical cleaning of shell and tube, assembling and pressure testing of Heat Exchangers ('Kettle' Type) which are located at higher elevation.
 - एक्सचेंजर को खोलना और ट्यूब बंडल को बाहर निकालना।
Disassembly of Exchanger and pulling out of the tube bundle.
 - ट्यूबों के बंडलों को जमीन के स्तर तक नीचे लाना।
Bringing down the tube bundles to ground level.
 - एक्सचेंजर के शेल और ट्यूब दोनों तरफ की सफाई के बाद, उन्हें कारखाने और बॉयलर के निरीक्षक के सामने खुले निरीक्षण के लिए प्रस्तुत किया जाना है।
Both shell and tube side of the Exchangers are to be offered for open inspection after cleaning to the inspector of Factories & Boilers.
 - खुली जांच के बाद, हीट एक्सचेंजर के शेल और ट्यूब दोनों तरफ के हिस्सों का आवश्यक परीक्षण दबाव पर हाइड्रो परीक्षण किया जाना चाहिए और इसे कारखानों और बॉयलरों के निरीक्षक को निरीक्षण के लिए प्रस्तुत किया जाना चाहिए। हीट एक्सचेंजर की असेंबली नए गैस्केट लगाने और नए नट और बोल्ट का उपयोग करने के बाद ही की जानी चाहिए।
After the open inspection, assembly of heat exchanger, both shell side & tube side is to be Hydro tested at the required test pressure and has to be offered for inspection to the inspector of Factories & Boilers. Assembly of the Heat Exchanger should be done after putting new gaskets and use new nuts and bolts.
- I. **यू-ट्यूब केटल टाइप एक्सचेंजर का ट्यूब साइड और शेल साइड प्रेशर टेस्टिंग**
TUBE SIDE & SHELL SIDE PRESSURE TESTING OF 'U'TUBE KETTLE TYPE EXCHANGERS
- ब्लाइंड लिस्ट के अनुसार ब्लाइंडिंग करें और स्टीमिंग और वाटर फ्लशिंग के लिए स्टीम/वाटर होसेस उपलब्ध कराएं। शेल कवर और ट्यूब बंडल को बाहर निकालें। ट्यूब बंडल और चैनल हेड को डालें/खड़ा करें और शेल साइड प्रेशर टेस्ट करें। यदि आवश्यक हो, तो एचओसी द्वारा प्रदान किए गए उपयुक्त एसएस प्लग का उपयोग करके लीक हो रही ट्यूबों को बंद करें।
Blinding as per the blind list and provide steam/water hoses for steaming and water flushing out. Open and remove the shell cover and tube bundle outside. Insert/erect the tube bundle and channel head and carry out the shell side pressure test, plug the leaky tubes using suitable SS plug provided by HOC if required.
 - चैनल कवर को पुनः जोड़ें और ट्यूब साइड प्रेशर टेस्ट करें तथा यदि कोई रिसाव हो तो जोड़ की जांच करें। सभी कनेक्टेड लाइनों को नए गैस्केट से ढक दें। इंचार्ज इंजीनियर के निर्देशनुसार स्टीम ट्रेसिंग और प्रेशर/टेम्परेचर गेज को पुनः स्थापित करें।
Reassemble the channel cover and carry out the tube side pressure test and attend the joint leakages if any. Box up/de-blind all connected lines with new gaskets. Fix back steam tracing and pressure/temperature gauges as required as per the instruction of Engineer-in-Charge.
 - क्षेत्र को अच्छी तरह से साफ करें। कार्य की गुणवत्ता TEMA/API/IBR और हीट एक्सचेंजर के लिए अन्य प्रासंगिक मानकों में दिए गए विनिर्देशों के अनुसार ही होनी चाहिए।

Clean the area thoroughly. The quality of the job shall be strictly as per the specification given in TEMA/API/IBR and other relevant standards for Heat Exchangers.

4. हीट एक्सचेंजर के निरीक्षण में लगी आईबीआर निरीक्षण टीम की सहायता करना।
Assisting the IBR inspecting team engaged in the inspection of Heat Exchangers.

II. परीक्षण और निरीक्षण

TESTING & INSPECTION

1. कार्य की समय-समय पर एचओसी निरीक्षण इंजीनियरों और कार्य के प्रभारी इंजीनियर द्वारा जांच की जाती है।

The work is subjected to inspect at all times by HOC Inspection Engineers and the Engineer-in-Charge of the job.

2. ठेकेदार को इन निरीक्षणों के दौरान दिए गए सभी निर्देशों का पालन करना होगा।
The contractor shall comply with all instructions given during these inspections.

3. एक्सचेंजर के ट्यूब साइड/शेल साइड की सफाई पूरी होने के बाद, इसे एर्नाकुलम के कारखाना एवं बॉयलर निरीक्षक के समक्ष खुली जांच के लिए प्रस्तुत किया जाना है।

After completing the tube side/shell side cleaning of the Exchanger, it is to be offered for open inspection to the Inspector of Factories & Boilers, Ernakulam.

4. इसके बाद शेल और ट्यूब साइड प्रेशर टेस्ट करें। प्रेशर टेस्ट के लिए एक्सचेंजर को हर तरह से तैयार किया जाना चाहिए और फिर इसे एर्नाकुलम के कारखाना एवं बॉयलर निरीक्षक को प्रस्तुत किया जाना चाहिए।

Then carry out the shell and tube side pressure test. The Exchangers shall be prepared in all respect for the pressure tests and then the same shall be offered to the Inspector of Factories & Boilers, Ernakulam.

5. दबाव परीक्षण के बाद यदि कोई रिसाव पाया जाता है, तो ठेकेदार उपयुक्त प्लग का उपयोग करके ट्यूबों को बंद कर देंगे।

After the pressure tests if any leak, the contractors shall plug the tubes with suitable plugs.

6. ट्यूब लीक की मरम्मत के बाद, एक्सचेंजर का ट्यूब और शेल दोनों तरफ से दोबारा परीक्षण किया जाएगा और फैक्ट्री एवं बॉयलर निरीक्षक द्वारा इसे मंजूरी दी जाएगी।

After rectifying tube leak the Exchangers shall be tested again both on the tube side and shell side and get cleared by the Inspector of Factories & Boilers.

7. निरीक्षण प्रक्रिया को पूरा करने के लिए पार्टी को आईबीआर प्राधिकरण के साथ संपर्क करना होगा।

The party has to liaison with IBR authority for completing the inspection procedure.

8. सफाई के उद्देश्य से, ठेकेदार को अपने खर्च पर ट्यूब बंडल को जमीन के स्तर तक नीचे लाना होगा।
For the purpose of cleaning, the tube bundle has to be brought down to ground level by the contractor at his cost.

9. कार्य पूर्ण होने के बाद, प्रभारी अभियंता के निर्देशानुसार उस क्षेत्र की अच्छी तरह सफाई करें।
After the completion of the work, clean the area thoroughly as per the instruction of Engineer-in-Charge.

III. प्रेशर सेफ्टी वाल्व, स्टीम सेपरेटर और अन्य वाल्वों का रखरखाव

MAINTENANCE OF PRESSURE SAFETY VALVES, STEAM SEPARATORS AND OTHER VALVES

1. हीट एक्सचेंजर या उससे जुड़ी पाइपिंग से जुड़े पीएसवी, स्टीम सेपरेटर, ब्लो डाउन वाल्व, स्टीम स्टॉप वाल्व और अन्य वाल्वों को उस स्थान से हटाना।

Removal of PSV, steam separators, Blow down valve, steam stop valve & other valves from the location, which are connected to the Heat Exchanger or its connected piping.

2. पीएसवी और अन्य वाल्वों के इनलेट/आउटलेट नोजल को बंद करें और उन पर ब्लाइंड टैग लगाएं तथा इसे ब्लाइंड रजिस्टर में दर्ज करें।
Blinding inlet/outlet nozzle of the PSV & other valves and put blind tags and record the same in the blind register.
3. पीएसवी/वाल्व/स्टीम सेपरेटर को जमीन पर उतारना और स्टीम सेपरेटर की सफाई करना।
Dropping the PSVs/Valves/Steam separators to the ground level & cleaning of Steam separators.
4. साइट से केंद्रीय कार्यशाला तक पीएसवी/वाल्वों का परिवहन।
Transportation of PSVs/ Valves from site to Central Workshop.
5. एचओसीएल द्वारा ओवरहालिंग, परीक्षण और तृतीय-पक्ष निरीक्षण के बाद, सेंट्रल वर्कशॉप से वाल्वों को एकत्र करें और उन्हें स्थापना के लिए वापस ले जाएं।
After overhauling, testing and third party inspection by HOCL, collect the valves from Central Workshop and transport it back for erection.
6. ब्लाइंड्स और ब्लाइंड टैग्स को हटा दें और नए गैस्केट और फास्टनर का उपयोग करके पीएसवी/वाल्व/स्टीम सेपरेटर को उनके संबंधित स्थानों पर वापस लगा दें।
Remove the blinds, blind tags and fix back the PSVs/Valves / Steam Separators at respective locations using new gaskets and fasteners.
7. इन कार्यों की लागत हीट एक्सचेंजर के रखरखाव के लिए निर्धारित दर में शामिल की जाएगी।
Cost of these works shall be absorbed in the quoted rate for the maintenance of Heat Exchanger.

IV. एचओसी द्वारा निःशुल्क उपलब्ध कराई जाने वाली सामग्री/सुविधाएँ
MATERIALS/ FACILITIES TO BE PROVIDED BY HOC FREE OF COST

1. आवश्यक पाइप फिटिंग आइटम, स्टीम होज, गैस्केट फेस कंपाउंड और गैस्केट सामग्री।
Necessary pipe fitting items, steam hoses, gasket face compounds and gaskets materials.
2. एचओसीएल ठेकेदार को केवल गैस्केट शीट (सीएएफ) (निःशुल्क) उपलब्ध कराएगी। ठेकेदार को गैस्केट को आवश्यक आकार में काटने की व्यवस्था स्वयं करनी होगी।
HOCL shall provide only the gasket sheets (CAF) (free of cost) to the contractor. The contractor has to make arrangements to cut the gaskets to the required size.
3. बांधनेवाला पदार्थ सामग्री।
Fastener materials.
4. एक्सचेंजर ट्यूब प्लग।
Exchanger tube plugs.
5. एक ही स्थान पर वायु, जल, भाप और बिजली जैसी उपयोगिताएँ उपलब्ध हैं।
Utilities like air, water, steam and electricity at one point.

V. ठेकेदार द्वारा उपलब्ध कराई जाने वाली सामग्री/सुविधाएँ
MATERIALS / FACILITIES TO BE PROVIDED BY CONTRACTOR

1. ठेकेदार को निम्नलिखित वस्तुओं की व्यवस्था स्वयं अपने खर्च पर करनी होगी: चेन पुली ब्लॉक, टेस्ट पंप और काम के लिए आवश्यक अन्य उठाने/र्होचने के उपकरण।
The following are to be arranged by the contractor at his own cost. Chain pulley blocks, test pumps, and other lifting/pulling tools and tackles required for the job.
2. इस कार्य के लिए आवश्यक सभी रिंच और अन्य औजार।
All wrenches and other tools required for the job.

3. संपूर्ण कार्य के सफल समापन के लिए आवश्यक क्रेन/डेरिक की व्यवस्था ठेकेदार द्वारा अपने खर्च पर की जाएगी। यदि एचओसीएल की मोबाइल क्रेन उपलब्ध हो, तो एचओसीएल उसे किराए पर ले सकता है, जिसका शुल्क 18 टन क्षमता वाली मोबाइल क्रेन के लिए 1000 रुपये प्रति घंटा होगा। (एचओसीएल क्रेन की अनुपलब्धता किसी भी स्थिति में विक्रेता को पूछताछ की शर्तों के सभी प्रावधानों को पूरा करने की जिम्मेदारी से मुक्त नहीं करेगी।)

Crane / derrick required for the successful completion of the entire work shall be arranged by the contractor at his own cost. HOCL shall permit the contractor to hire the HOCL's mobile crane on chargeable basis if it is available and the rate shall be Rs.1000/hr. for mobile crane of capacity 18T. (Non availability of HOCL crane shall in no way relieve the vendor of his responsibility in meeting all the provisions of the Enquiry conditions)

4. स्टील मचान सामग्री (पाइप और क्लैप) और यदि आवश्यक हो तो इसकी स्थापना की व्यवस्था ठेकेदार की जाएगी।
Steel Scaffolding material (pipe and clamps) and its erection if required shall be arranged by the contractor.
5. शेल साइड और ट्यूब साइड प्रेशर टेस्ट/निरीक्षण करने के लिए आवश्यक सुविधाएं और सहायता।
Facilities and assistance required to carry out the shell side and tube side pressure tests /inspection.
6. कार्य को संतोषजनक ढंग से पूरा करने के लिए आवश्यक अन्य सभी सुविधाएं/उपकरण, जिनका उल्लेख एचओसीएल की आपूर्ति के दायरे में नहीं किया गया है।
All other facilities/equipment which are required for satisfactory completion of the job and which are not mentioned in the scope of supply of HOCL.
7. ठेकेदारों को एचओसीएल के सुरक्षा नियमों और विनियमों का कड़ाई से पालन करना होगा।
The contractors shall strictly abide by the safety rules and regulations of HOCL.
8. ठेकेदार को संबंधित संयंत्र अधिकारी से कार्य परमिट प्राप्त करना होगा।
The contractor shall obtain work permit from the concerned Plant Officer.

कार्यस्थल का दौरा और कार्य से परिचित होना

SITE VISIT & FAMILIARIZATION OF THE JOB

चूंकि ये एक्सचेंजर अलग-अलग आकार और अलग-अलग ऊंचाई पर स्थित हैं, इसलिए ठेकेदार को कोटेशन जमा करने से पहले एचओसी का दौरा करना चाहिए और काम से पूरी तरह परिचित हो जाना चाहिए।

As these exchangers are of different sizes and at different elevations, the contractor shall visit HOCL and familiarize with the job thoroughly before submitting the quotation.

चूंकि यह काम तत्काल किया जाना है, इसलिए प्रत्येक एक्सचेंजर के लिए दो (2) अलग-अलग दल/उपकरण और उपकरण की व्यवस्था की जाएगी।

SINCE THIS WORK IS TO BE DONE URGENTLY, TWO (2) SEPARATE CREWS / TOOLS & TACKLES SHALL BE ARRANGED FOR EACH EXCHANGER.

संलग्नक ANNEXURE- III

विशेष शर्तें- 2026 Special Conditions- 2026

एचओसीएल ने 2024 में 30 दिनों का शटडाउन करने की योजना बनाई है। चूंकि बाहरी परिस्थितियां एचओसीएल के लिए अनुकूल हैं, इसलिए संयंत्र को जल्दी चालू करने के लिए सभी कार्यों को निर्धारित अवधि के भीतर पूरा करना होगा। ठेकेदार को 12 घंटे की शिफ्ट (2 शिफ्ट - सुबह 8:00 बजे से रात 8:00 बजे तक और रात 8:00 बजे से सुबह 8:00 बजे तक) में पूरी क्षमता से कर्मचारियों को नियुक्त करना होगा। ठेकेदार को अपना प्रस्ताव प्रस्तुत करते समय इसका ध्यान रखना होगा। किसी भी प्रकार का विचलन गंभीरता से लिया जाएगा। कृपया यह भी ध्यान दें कि एनआईटी में उल्लिखित पूर्णता अवधि प्रत्येक कार्य के लिए है। (अतः, एलडी क्लॉज प्रत्येक कार्य पर लागू होगा।)

HOCL is planning to take 30 days shutdown in 2024. Since the external environment is favourable to HOCL, all works has to be completed within the stipulated period for early startup of plant. The contractor has to put people as 12 hrs. shift basis (2 shifts – 8.00AM – 8.00PM, 8.00PM – 8.00AM) in full strength. Contractor has to take care the same while submitting their offer. Any deviation will be viewed very seriously. Also please note that the completion period spelt in NIT is for each work. (Hence, the LD Clause will be applicable to each work also.)

1. ठेकेदार को यह सुनिश्चित करना होगा कि प्रत्येक साइट पर दोनों शिफ्टों में एक इलेक्ट्रीशियन और एक सुरक्षा अधिकारी उपलब्ध हों।
Contractor has to ensure that one electrician and one safety officer should be available in both the shifts in each site.
2. ठेकेदार को यह सुनिश्चित करना होगा कि शिफ्ट परिवर्तन के दौरान कोई देरी न हो। शिफ्ट परिवर्तन के समय (सुबह 8:00 बजे और शाम 8:00 बजे) काम उसी गति से जारी रहना चाहिए। ठेकेदार को श्रमिकों को समय से पहले बुलाने के लिए आवश्यक उपाय करने होंगे।
Contractor has to ensure that there should not be any delay in shift change overtime. The work has continue in same momentum during shift change time (8.00AM & 8.00PM). Measures to be made by the contractor to bring workers in advance for the same.
3. कार्य के लिए आवश्यक सभी जनशक्ति, औजार, उपकरण, हाइड्रोलिक परीक्षण पंप, उठाने के उपकरण, रस्तियाँ, तार ब्रश, चेन पुली ब्लॉक, व्हील बैरो आदि की व्यवस्था ठेकेदार द्वारा की जाएगी। ठेकेदार द्वारा कार्य के लिए लाए जाने वाले औजारों और उपकरणों की सूची निविदा के साथ संलग्न करनी होगी।
All manpower, tools, tackles, hydraulic test pumps, lifting tools, ropes, wire brushes, chain pulley block, wheel barrows etc. whatever required for the work are to be arranged by the contractor. **A list of tools and tackles intended to be brought for the work by the contractor has to be kept along with the bid.**
4. कार्य के लिए आवश्यक स्पाइरल वाउंड गैस्केट, बोल्ट, नट और फास्टनर एचओसीएल द्वारा आवश्यकतानुसार निःशुल्क उपलब्ध कराए जाएंगे। हालांकि, प्रारंभिक ब्लाइंडिंग के लिए एचओसीएल केवल गैस्केट शीट ही जारी करेगा। ठेकेदार को इसे अपने खर्च पर सही आकार में काटना होगा।
Spiral wound Gaskets, bolts, nuts, fasteners required for the work will be supplied by HOCL free of cost **as per requirement**. But HOCL will issue only the gasket sheets for initial blinding. It has to be cut to the correct size by the contractor at his cost.

5. काम के लिए नियुक्त श्रमिकों और पर्यवेक्षक के लिए सुरक्षा हेलमेट, सुरक्षा जूते, चश्मे, सुरक्षा बेल्ट और अन्य व्यक्तिगत सुरक्षा उपकरण आदि की व्यवस्था ठेकेदार द्वारा की जानी है।
Safety Helmets, safety shoes, goggles, safety belts and other PPEs etc. for the workmen and supervisor employed for the work are to be arranged by the contractor.
6. ठेकेदार के कर्मचारियों द्वारा सुरक्षा उपकरण (पीपीई), कार्य आदेश, सीमित स्थान प्रवेश रिकॉर्ड और सुरक्षा कार्य परमिट पहने बिना कोई भी कार्य नहीं किया जाएगा।
No work to be carried out without wearing safety gadgets (PPE's), work order, confined space entry record and safety work permit by the employees of the contractor.
7. यह कार्य एक शटडाउन गतिविधि है और आपको इसे समय पर पूरा करने के लिए हर संभव प्रयास करना होगा। साथ ही, आपको इंजीनियर-इन-चार्ज के निर्देशानुसार चौबीसों घंटे कर्मचारियों को तैनात करना होगा।
This work is a **shutdown activity** and you have to put all efforts to complete the work in time. Also you have to deploy people on round the clock basis as per the instruction of Engineer-in-Charge.
8. संपूर्ण कार्य मानक इंजीनियरिंग पद्धति के अनुसार किया जाएगा और एचओसी/तृतीय पक्ष निरीक्षण एजेंसी द्वारा चरणबद्ध निरीक्षण के अधीन होगा।
The entire work is to be carried out as per the standard engineering practice and subjected to stage inspection by HOC/3rd party inspection agency.
9. कार्य से उत्पन्न होने वाले सभी मलबे, अपशिष्ट आदि को अलग-अलग करके तौलना, परिवहन करना और प्रभारी अभियंता के निर्देशानुसार आपके खर्च पर स्क्रैप यार्ड में डालना अनिवार्य है। ठेकेदार को पर्यावरण संरक्षण संबंधी दिशानिर्देशों का भी पालन करना होगा।
All debris, waste etc. arising out of the job should be segregated weighed, transported and dumped into the scrap yard as per the instruction of Engineer-in-Charge at your cost. The contractor also has to abide by the guidelines for Environmental Protection.
10. कार्य की प्रगति और गुणवत्ता असंतोषजनक पाए जाने पर एचओसी को कार्य रोकने का पूरा अधिकार है। शेष कार्य एचओसी द्वारा किसी अन्य एजेंसी के माध्यम से प्रथम ठेकेदार के खर्च और जोखिम पर संपन्न किया जाएगा।
HOC has every right to stop the work if the progress and quality of work is found unsatisfactory.
The balance work will be carried out by HOC through another agency at the cost and risk of the first contractor.
11. ठेकेदार को काम शुरू करने की सूचना मिलने के 24 घंटों के भीतर आवश्यक उपकरणों और औजारों के साथ पूरी टीम को जुटाना होगा।
Contractor has to mobilize the complete team with necessary tools and tackles within 24 hours from the time of intimation to start the work.
12. ठेकेदार या उसका अधिकृत पर्यवेक्षक दोनों शिफ्टों में काम के दौरान कार्यस्थल पर लगातार उपस्थित रहना चाहिए।
13. Either the contractor or his authorized supervisor shall be available at work site throughout the work in both shifts.
14. चूंकि यह एक बंद परियोजना है, इसलिए दिखाई गई मात्रा स्थिति के अनुसार बदल सकती है, यानी बढ़ या घट सकती है। हालांकि, ठेकेदार द्वारा किए जाने वाले अनुबंध की पूरी अवधि के दौरान दर और अन्य नियम एवं शर्तें समान रहेंगी।

Being a shutdown job, the quantity shown can vary ie. Increase or decrease depending upon the situation. However, the rate and other terms and conditions shall be same throughout the pendency of the contract for which the contractor shall be ready.

15. ठेकेदार द्वारा अपने कर्मचारियों के प्रति कार्य निष्पादन के दौरान होने वाली किसी भी दुर्घटना से उत्पन्न होने वाली देयता को कवर करने के लिए उचित बीमा की व्यवस्था की जाएगी।
Appropriate insurance shall be arranged by the contractor for the coverage of the liability to the people employed by them, arising out of any accident occurring during the execution of the work.
16. ठेकेदार को अनुबंध में उल्लिखित सभी प्रावधानों का पालन करना होगा – ईएसआई, सुरक्षा विनियम और अनुबंध की सामान्य शर्तें, कामगार मुआवजा, व्यक्तिगत सुरक्षा उपकरण (पीपीई), श्रम कानून, पीएफ, पर्यावरण संरक्षण और सीमित स्थान में प्रवेश के लिए ठेकेदारों/आपूर्तिकर्ताओं के लिए दिशानिर्देश, मचान चेकलिस्ट, मचान मैनुअल और मचान के पुर्जे और स्थापना प्रक्रिया (ट्यूब और क्लैंप)।
The Contractor shall follow all clauses in Annexures – ESI, Safety Regulations and General Conditions of Contract, Workmen Compensation, Personal Protective Equipments (PPE), Labour Laws, PF, Guidelines to contractors/suppliers for environmental protection & Confined Space Entry, Scaffolding Checklist, Scaffolding Manual & Scaffolding Parts & Erection Procedure (Tube & Clamp).
17. ठेकेदार को मुख्यालय में सामग्री लाने के लिए प्रभारी अभियंता से पूर्व अनुमति प्राप्त करनी होगी।
Contractor shall get prior permission from the Engineer-in-Charge for bringing the material to HOC.
18. ठेकेदार यह सुनिश्चित करेगा कि जब काम किसी सीमित स्थान के अंदर हो रहा हो तो मैन-वे नोजल के बाहर एक स्टैंडबाय व्यक्ति मौजूद रहे।
Contractor shall ensure that a standby person is kept outside the man-way nozzle when the work is inside a confined space.
19. आपसे अनुरोध है कि प्रस्ताव जमा करने से पहले कार्य की सटीक मात्रा/स्थल की स्थिति का पता लगाने और उससे परिचित होने के लिए साइट पर जाएँ।
You are requested to visit the site to ascertain the exact quantum of work/site condition and get acquainted before submitting your offer.

संलग्नक ANNEXURE- IV

अनुपालन/अविचलन विवरण COMPLIANCE / NO-DEVIATION STATEMENT

एतद्द्वारा यह कहा गया है कि हमारे द्वारा प्रस्तुत कोटेशन/प्रस्ताव जांच के खिलाफ जारी किए गए सभी दस्तावेजों के पूर्ण अनुपालन में हैं और यह भी पुष्टि की है कि जांच के अनुसार सभी नियमों और शर्तों से कोई विचलन नहीं है।

It is hereby stated that the quotation/offer submitted by us is in full compliance with all the documents issued against the enquiry and also further confirmed that there is no deviation from all the terms and conditions as per the enquiry.

निविदाकर्ता के हस्ताक्षर Signature of the Tenderer :

निविदाकर्ता का नाम Name of the Tenderer :

पता Address :

स्थान Place : मोहर SEAL

दिनांक Date :

संलग्नक ANNEXURE - V

अनुबंध की सामान्य शर्तों (जीसीसी) का अनुपालन
COMPLIANCE OF GENERAL CONDITIONS OF CONTRACT (GCC)

एतद्द्वारा यह कहा गया है कि हमने अनुबंध की सामान्य शर्तों (जीसीसी) को पढ़ा और समझा है और पुष्टि की है कि हम जीसीसी के सभी नियमों और शर्तों का पालन करते हैं।

It is hereby stated that we have read and understood General Conditions of Contract (GCC) and confirm that we abide by all the terms and conditions of GCC.

निविदाकर्ता के हस्ताक्षर Signature of the Tenderer :

परिशिष्ट ANNEXURE- VI

जाँच सूची CHECK LIST

बयाना राशि जमा - एमएसएमई / एसएसआई इकाइयों / पीएसयू पर लागू नहीं है
EARNEST MONEY DEPOSIT - NOT APPLICABLE TO MSME / SSI Units /PSUs

कोटेशन के साथ **₹9,700/-** की ईएमडी राशि संलग्न होनी चाहिए, जिसका भुगतान क्रॉस डीडी/बैंकर्स चेक/एनईएफटी के माध्यम से किया जाएगा।

Quotation shall accompany an EMD of **₹9,700/- shall be paid by crossed DD/Bankers Cheque thro' NEFT.**

बैंक विवरण - स्टेट बैंक ऑफ इंडिया
Bank Details - State Bank of India
- A/c No. 37881840330
- IFSC - SBIN0013551
शाखा का नाम - बेलापुर, मुंबई^ई
Branch Name - Belapur, Mumbai

बैंक हस्तांतरण का विवरण आपके तकनीकी प्रस्ताव में अवश्य शामिल होना चाहिए। बिना अग्रिम भुगतान राशि (ईएमडी) के प्रस्तुत किए गए कोटेशन अस्वीकृत किए जा सकते हैं।

Details of bank transfer should be indicated in your technical offer. Quotations not accompanied with EMD, are liable to be rejected.

निविदाकर्ता की ईएमडी निम्नलिखित परिस्थितियों में जब्त कर ली जाएगी:-

EMD of the tenderer will be forfeited under the following conditions:-

9. निविदा खुलने के बाद यदि निविदाकर्ता अपनी निविदा वापस ले लेता है या अपनी प्रस्तावित दरों में वृद्धि कर देता है।
If after opening of the tender, the tenderer revokes his tender or increase his quoted rates.
10. यदि निविदाकर्ता अनुबंध दिए जाने के बाद काम शुरू नहीं करता है।
If the tenderer does not commence the work after awarding the contract.
11. ईएमडी पर कोई ब्याज नहीं दिया जाएगा।
No interest on EMD will be paid.
12. सफल निविदाकर्ता की ईएमडी को सुरक्षा जमा राशि के विरुद्ध समायोजित किया जाएगा।
EMD of the successful tenderer will be adjusted against the security deposit.
13. अनुबंध को अंतिम रूप दिए जाने के बाद असफल बोलीदाताओं की ईएमडी राशि वापस कर दी जाएगी और इस पर कोई ब्याज देय नहीं होगा।
EMD of unsuccessful bidders shall be refunded after finalization of the contract and no interest shall be payable.
14. निविदा को उसकी वैधता अवधि के दौरान रद्द या परिवर्तित किया जा सकता है।
The tender is revoked or varied during its validity period.
15. निविदा खुलने के बाद और उसकी वैधता अवधि के दौरान कीमतों में एकतरफा वृद्धि की जाती है।
The Prices are increased unilaterally after the tender opening and during its validity.
16. निविदा स्वीकार किए जाने की सूचना मिलने के बाद निविदाकर्ता निर्धारित समय के भीतर समझौते पर हस्ताक्षर करने या सुरक्षा जमा राशि जमा करने में विफल रहता है।

The tenderer after intimation of acceptance of the tender fails to execute the agreement/or furnish security deposit within the stipulated time.

पूर्व-योग्यता मानदंड (तकनीकी बोली के साथ शामिल की जानी है)

PRE-QUALIFICATION CRITERIA (TO BE INCLUDED IN THE TECHNICAL BID)

निविदाकर्ता तकनीकी बोली (मूल्य रहित बोली) में निम्नलिखित प्रस्तुत करेंगे जिसके बिना निविदा को अस्वीकार कर दिया जाएगा।

The Tenderers shall submit the following in the Technical bid (Un priced Bid) without which the tender will be rejected.

तकनीकी निविदा के साथ केरल फैक्ट्रीज एंड बॉयलर्स द्वारा जारी वैध आईबीआर लाइसेंस की एक प्रति संलग्न करना अनिवार्य है। वैध आईबीआर प्रमाणपत्र के बिना प्रस्तुत निविदा को तत्काल अस्वीकार कर दिया जाएगा।

THE PARTY HAS TO ATTACH A COPY OF THE VALID IBR LICENSE ISSUED FROM KERALA FACTORIES & BOILERS ALONG WITH THE TECHNICAL BID. QUOTATION WITHOUT VALID IBR CERTIFICATE WILL BE SUMMARILY REJECTED.

क) निविदा दस्तावेज के विभिन्न खंडों में निर्धारित निविदाकर्ता द्वारा विधिवत भरे और हस्ताक्षरित निविदा दस्तावेज का पूरा सेट।

c. Complete set of Tender Document duly filled in and signed by the Tenderer as prescribed in different clauses of the Tender Document.

ख) निविदाकर्ता द्वारा जीसीसी संबंधित भागों में विधिवत भरा, सभी पृष्ठों पर हस्ताक्षर और मुहर लगाई गई (निविदाकर्ता ओं को हमारी वेबसाइट www.hoclkochi.com से जीसीसी (अनुबंध की सामान्य शर्तें) डाउनलोड करना होगा और इसे तकनीकी बोली के साथ सभी पृष्ठों में विधिवत हस्ताक्षरित और मुहर लगाकर वापस करना होगा।

d. GCC duly filled in the relevant portions, signed and stamped all the pages by the tenderer (The tenderers have to download the GCC (General Conditions of Contract) from our web site www.hoclkochi.com and the same has to be returned along with the technical bid duly signed and stamped in all pages.

पूर्व-योग्यता मानदंड (एचओसीएल के पहले से पंजीकृत विक्रेताओं पर लागू नहीं)

Pre-qualification Criteria (Not applicable to already registered vendor of HOCL)

m. पिछले पांच वर्षों के दौरान निष्पादित समान कार्यों का अनुभव और मौद्रिक मूल्य, कार्यों के संतोषजनक समापन का प्रमाण आदि जैसे विवरण।

Experience on similar works executed during the last five years and details like monetary value, proof of satisfactory completion of works etc.

n. निविदा दस्तावेज में निर्दिष्ट तरीके से बयाना राशि।

Earnest Money in the manner specified in the Tender document.

o. संगठन चार्ट साइट पर क्षेत्र प्रबंधन का विवरण देते हुए, निविदाकर्ता साइट प्रभारी के बायो-डेटा और प्रमुख कर्मियों सहित इस कार्य के लिए प्रस्ताव करता है।

Organization chart giving details of field management at SITE, the tenderer proposes to have for this work including bio-data of the Site-in Charge and key personnel.

p. बोलीदाता के पास कार्य के विभिन्न चरणों को संभालने के लिए पर्याप्त संख्या में अच्छी तरह से योग्य कार्यबल होना चाहिए। कर्मचारियों/श्रमिकों का विवरण प्रस्तुत किया जाना है।

The bidder should have well qualified workforce in adequate numbers for handling various stages of the work. The staff/workers details are to be furnished.

q. बोलीदाता के पास निर्धारित समय के भीतर कार्य के निष्पादन के लिए पर्याप्त संख्या में उपकरण/उपकरण/टैकल/स्कैफोल्डिंग पाइप /क्लैंप/स्टेजिंग सामग्री होनी चाहिए। उपकरण का विवरण प्रस्तुत किया जाना चाहिए।

The bidder should have adequate number of equipment/tools/tackles/scaffolding pipe/clamps/ staging

materials in sound condition for the execution of the work within the stipulated time. The equipment details should be furnished.

- r. कार्य आदेशों की प्रतियां पहले ही पूरी हो चुकी हैं या प्रगति पर हैं
Copies of work orders already completed or in progress
- s. निविदा ए, बी, सी, डी, ई, एफ, एच, क्यू आर, एस और एसी में पूछे गए विवरण के साथ होनी चाहिए
Tender should accompany the details asked in A, B,C, D, E , F, H, Q, R, S & AC
- t. पूर्णता प्रमाण पत्र Completion certificates
- u. जीएसटीएन पंजीकरण GSTN registration
- v. निविदाकर्ता के बारे में जानकारी जैसा कि खंड 1 में निर्धारित है।
Information regarding tenderer as stipulated in Clause.1 .
- w. खंड 3 में निर्धारित अनुसार निविदाकर्ता द्वारा किए गए समान प्रकार और परिमाण के कार्य का विवरण।
Details of work of similar type and magnitude carried out by the tenderer as stipulated in Clause.3.
- x. खंड संख्या और पृष्ठ संख्या के संदर्भ में अपवाद और विचलन, यदि कोई हो, निविदा एक अलग विवरण (विचलन विवरण) के रूप में प्रस्तुत की जाएगी
Exceptions and deviations, if any, with reference to the Clause No. and page No. of Tender shall be submitted as a separate statement (Deviation Statement)

Clause - 1 & 2 (not applicable to MSME)

- 1. पिछले वित्तीय वर्ष की 31 मार्च को समाप्त होने वाले पिछले 3 वर्षों के दौरान औसत वार्षिक वित्तीय कारोबार कम से कम ₹1 लाख होना चाहिए। (वार्षिक वित्तीय कारोबार का विवरण दस्तावेजी प्रमाण के साथ प्रस्तुत किया जाना चाहिए)।
Average annual financial turnover during the last 3 years, ending 31st March of the previous financial year, should be at least ₹1 Lakhs. (Details of annual financial turnover to be submitted with Documentary proof).

- 2. आवेदन आमंत्रित किए जाने वाले महीने के अंतिम दिन तक पिछले 7 वर्षों के दौरान समान कार्यों को सफलतापूर्वक पूरा करने का अनुभव निम्नलिखित में से कोई एक होना चाहिए:
Experience of having successfully completed similar works during last 7 years ending last day of month previous to the one in which applications are invited should be either of the following:

तीन समान पूर्ण किए गए कार्य जिनकी लागत ₹1.296 लाख से कम नहीं है।

Three similar completed works costing not less than the amount equal to ₹1.296 Lakhs.

या OR

दो समान पूर्ण किए गए कार्य जिनकी लागत ₹1.62 लाख से कम नहीं है।

Two similar completed works costing not less than the amount equal to ₹1.62 Lakhs.

या OR

इसी प्रकार का एक पूर्ण कार्य जिसकी लागत ₹2.59 लाख से कम नहीं है।

One similar completed works costing not less than the amount equal to ₹2.59 Lakhs.

- 3. जिन पार्टियों को अवकाश सूची या पार्टियों में ब्लैकलिस्टेड/रखा गया है, जिनके संबंध में एचओसीएल/किसी सरकारी/अर्ध सरकारी एजेंसियों या किसी पीएसयू द्वारा ब्लैकलिस्टिंग/हॉलिडे लिस्टिंग के लिए कार्रवाई शुरू की गई है, उन्हें नौकरी देने के लिए विचार नहीं किया जाएगा। निविदाकर्ता को इसके संबंध में एक लिखित घोषणा देनी चाहिए।

The parties who have been blacklisted / put in holiday list or parties in respect of whom action has been initiated for Blacklisting / Holiday listing by HOCL/any government / Quasi government

agencies or any PSUs shall not be considered for award of job. The tenderer should give a written declaration regarding the same.

4. हमारे जीसीसी के खंड संख्या 3.7 के अलावा, निविदाकर्ता जो निविदा पूछताछ दस्तावेज के अनुसार बुनियादी आवश्यकताओं (तकनीकी / वाणिज्यिक) को पूरा नहीं करता है और आवश्यक वस्तुओं, सेवाओं आदि की लागत/ उपयोगिता / प्रदर्शन पर महत्वपूर्ण असर डालने वाली कोई अन्य महत्वपूर्ण शर्त है। अनुत्तरदायी माना जाएगा और निविदा अस्वीकृति के लिए उत्तरदायी होगी।

In addition to Clause No.3.7 of our GCC, the tenderer who do not meet the basic requirements (technical / commercial) as per the tender enquiry document and any other important condition having significant bearing on the cost / utility / performance of the required goods, services etc. will be treated as unresponsive and the tender will be liable to rejection.

निविदाकर्ता के हस्ताक्षर Signature of the Tenderer : _____

निविदाकर्ता का नाम Name of the Tenderer : _____

पता Address : _____

संलग्नक का ANNEXURE - A

ईएसआई, पीएफ, श्रम कानून आदि - आवश्यकताएं ESI, PF, LABOUR LAW ETC. – REQUIREMENTS

1. ईएसआई अधिनियम 1948 के अनुसार ईएसआई *ESI As per the ESI Act 1948*

ठेकेदार काम के लिए तैनात अपने सभी लोगों को ईएसआई योजना में नामांकित करेगा। ईएसआई योजना के तहत सभी कामगारों के पंजीकरण का भी अनुपालन किया जाना है।

The Contractor shall enroll all his men deployed for the work in the ESI scheme. Registration for all workmen under ESI scheme is also to be complied with.

2. सुरक्षा विनियम और अनुबंध की सामान्य शर्तें *Safety Regulations and General Conditions of Contract*

ठेकेदार को जीसीसी में निर्दिष्ट एचओसी के सभी सुरक्षा विनियमन का कड़ाई से पालन करना चाहिए। ठेकेदार को हर दिन प्रत्येक शिफ्ट में काम शुरू करने से पहले अधिकृत अधिकारी से आवश्यक सुरक्षा कार्य परमिट प्राप्त करना चाहिए।

The Contractor should be strictly abide all the safety regulation of HOC specified in GCC. Contractor should obtain necessary safety work permit from authorised officer before starting the work every day, in every shift.

3. कामगार मुआवजा *Workmen Compensation*

कर्मकार मुआवजा अधिनियम 1923 के तहत मुआवजे के सभी दावों को पूरा करना आपकी जिम्मेदारी होगी। काम पूरा करने के लिए आपके द्वारा लगाए कामगारों को हुई बीमारी, दुर्घटनाओं से चोट या मौत के संबंध में ईएसआई या किसी अन्य कानून। कर्मचारी राज्य बीमा अधिनियम 1948 का पालन करना ठेकेदार की एकमात्र जिम्मेदारी होगी। आप अपने द्वारा किए गए ठेके कार्य के निष्पादन से या उसके दौरान उत्पन्न होने वाली संपत्ति की हानि या व्यक्तियों को हुई नुकसान के दावों के संबंध में भी जिम्मेदार और उत्तरदायी होंगे। आप एतद्वारा सहमत हैं कि आप कर्मकार मुआवजा अधिनियम और उपरोक्त सभी अन्य दावों के तहत दावों के संबंध में पूरी तरह से एचओसी को क्षतिपूरित रखेंगे और आप किसी भी परिस्थिति में इसके संबंध में कोई विवाद नहीं उठाएंगे।

It will be your responsibility to meet all claims for compensation under workmen's Compensation Act 1923. ESI or under any other law in respect of sickness, accidents injury or death suffered by workmen engaged by you for carrying out the work. It shall be the sole responsibility of the contractor to comply with Employee's State Insurance Act 1948. You will also be responsible and liable in respect of claims for damage to property or persons arising from or in the course of execution of the contract work undertaken by you. You hereby agree that you shall keep HOC fully indemnified in respect of claims under the Workmen Compensation Act and all other claims aforesaid and you shall not under any circumstances raise any dispute with regard to the same.

4. व्यक्तिगत सुरक्षा उपकरण (पीपीई) *Personal Protective Equipments (PPE)*

आपसे अनुरोध है कि व्यक्तिगत सुरक्षा उपकरणों का उपयोग करें जैसे कि

You are requested to use personal protective equipment such as

1. सुरक्षा हेलमेट Safety Helmet
2. सुरक्षा बेल्ट Safety belts
3. वेल्डर के व्यक्तिगत सुरक्षा उपकरण जैसे गॉगल्स, दस्ताने, जूते और फेस शील्ड

Welder's Personal Protective equipment like goggles, gloves, shoes and face shield

COVID-19 के प्रसार को रोकने के उपाय के रूप में, निम्नलिखित पीपीई अनिवार्य रूप से आपके श्रमिकों को प्रदान करने की आवश्यकता है:

As a measure to contain the spread of COVID-19, the following PPEs are essentially required to be provided to your workers:

1. फेस मास्क Face Mask
2. फेस शील्ड Face Shield
3. हैंड ग्लोव्स Hand Gloves

साथ ही आपके सभी श्रमिकों को सुरक्षा पर तापमान की जांच, प्रवेश द्वार पर हाथ धोना, जहां तक संभव हो शारीरिक दूरी बनाए रखना है।

Also all your workers are to be subjected to temperature screening at Security, hand wash at the entrance, maintain physical distancing as far as possible.

आप अपने श्रमिकों को कड़ाई से निर्देश देंगे कि वे सार्वजनिक स्थानों और काम के क्षेत्र में न थूकें। You shall strictly instruct your workers not to spit in the public places and area of work.

यह ठेकेदार की मूल जिम्मेदारी है कि वह अपने सभी पर्यवेक्षकों/श्रमिकों को ऊपर उल्लिखित सभी सुरक्षा उपकरण (पीपीई) प्रदान करे।

It is the basic responsibility of the Contractor to provide all the safety gadgets (PPEs) as mentioned above to all their Supervisors/Workers.

और इन पीपीई के बिना ठेकेदार को कोई भी काम करने की अनुमति नहीं दी जाएगी, जिसे कृपया नोट किया जा सकता है।

And without these PPEs Contractor will not be allowed to carryout any job, which may please be noted.

5. श्रम कानून और भविष्य निधि Labour Laws & Provident Fund

आपसे अनुरोध है कि आपके पास होने के लिए You are requested to possess:

1. अनुबंध श्रम (विनियमन और उन्मूलन) अधिनियम 1970 के तहत श्रम विभाग से एक लाइसेंस।
A License from the Labour Dept. under Contract Labour (Regulation and Abolition) Act 1970.
2. कर्मचारी पीएफ अधिनियम - 1952 के तहत एक अलग पीएफ कोड और क्षेत्रीय पीएफ आयुक्त के साथ किए गए सीपीएफ योगदान भुगतान का विवरण भी प्रस्तुत करें।
A separate PF Code under the Employee PF Act – 1952 and also furnish details of CPF Contribution payment made with the Regional PF Commissioner.

6. पर्यावरण संरक्षण के लिए ठेकेदारों/आपूर्तिकर्ताओं को दिशानिर्देश

Guidelines to Contractors/Suppliers for Environmental Protection

- ठेकेदार/आपूर्तिकर्ता यह सुनिश्चित करेंगे कि वस्तुओं और सेवाओं के पर्यावरणीय पहलुओं के कारण प्रभाव न्यूनतम है।
Contractors/suppliers shall ensure that impact due to the environmental aspects of goods and services is minimum.
- गतिविधि के दौरान उत्पन्न अपशिष्ट को प्रभारी अभियंता द्वारा दिए गए निर्देशों के अनुसार अपशिष्ट उपचार संयंत्र में भेजा जाना है।
Effluent generated during the activity is to be routed to effluent treatment plant as per the instructions given by the Engineer-in-Charge.
- गतिविधि के दौरान उत्पन्न खतरनाक अपशिष्ट का निपटान प्रभारी अभियंता द्वारा दिए गए निर्देशों के अनुसार खतरनाक अपशिष्ट (प्रबंधन और हैंडलिंग) नियमों के अनुसार किया जाना है।
Hazardous waste generated during the activity is to be disposed in accordance with Hazardous Waste (Management & Handling) Rules as per the instructions given by the Engineer-in-Charge.

- अन्य सभी ठोस कचरे का निपटान प्रभारी अभियंता द्वारा दिए गए निर्देशों के अनुसार किया जाना है।
All other solid wastes are to be disposed as per the instructions given by the Engineer-in-Charge.
- पर्यावरण पर प्रभाव को कम करने के लिए रिसाव और स्पिल से बचें। किसी भी रिसाव / स्पिल के मामले में तुरंत प्रभारी अभियंता को उचित सुधारात्मक कार्रवाई करने के लिए सूचित करें।
Avoid leaks and spills to minimise the impact on environment. In the case of any leaks/spills immediately inform Engineer-in-Charge to take appropriate corrective action.
- यदि संभाली गई वस्तु खतरनाक श्रेणी में आती है, तो कृपया सुनिश्चित करें कि:
If the item handled falls under hazardous category, please ensure that:
 - क. खेप के साथ एमएसडीएस /टीआरईएम कार्ड आदि सहित उत्पाद साहित्य।
a. Product literature including MSDS/TREM Card etc. accompany the consignment.
 - ख खतरनाक रसायनों के विनिर्माण, भंडारण और आयात संबंधी नियमों की आवश्यकता के अनुसार पैकिंग और लेबलिंग होंगे।
b. Packing and labeling are in accordance with the requirement of Manufacture, Storage & Import of Hazardous Chemicals Rules.

7. ख सीमित क्षेत्र प्रवेश *B. Confined Space Entry*

यदि एक सीमित स्थान में प्रवेश (जैसे स्तंभों में प्रवेश के अंदर, हीट एक्सचेंजर शेल, वेसल्स, फिल्टर, स्फियर, बुलेट्स, बॉयलर आदि) कार्य का एक हिस्सा है, ठेकेदार को प्रत्येक बार उद्देश्य के लिए रखे गए रजिस्टर में नाम और अन्य विवरण दर्ज करना चाहिए। सभी सुरक्षा विनियमन का पालन किया जाना चाहिए और सीमित स्थान में प्रवेश करने से पहले प्राप्त करने की अनुमति दी जानी चाहिए। इसके अलावा, सीमित स्थान से बाहर आने के बाद, कार्यकर्ता/पर्यवेक्षक को हर बार बिना किसी असफलता के प्रभारी अभियंता-को रिपोर्ट करना पड़ता है। किसी भी मामले में इस रजिस्टर में किसी भी विचलन की अनुमति नहीं दी जाएगी।

If entry into a confined space (like inside entry to columns, heat exchanger shells, vessels, filters, spheres, bullets, boilers etc.) is a part of the work, contractor should register the name and other details in the register kept for the purpose each time. All safety regulation has to be adhered and permit to be obtained before entering into a confined space. Also after coming out from the confined space, the worker/supervisor has to report to the Engineer-in-Charge each time without fail. Any deviation in this register will not be permitted in any case.

संलग्नक- ख ANNEXURE - B
श्रम कानून- जांच सूची LABOUR LAWS – CHECK LIST

1. ठेका श्रम (विनियमन और उन्मूलन) अधिनियम - 1970

Contract Labour (Regulation & Abolition) Act – 1970

- यह सुनिश्चित करेगा कि उपकरण, सामग्री, उपभोग्य वस्तुएं आवश्यकताओं के अनुरूप हैं।

Shall ensure that the equipment, materials, consumables are in conformity with the requirements.

- यह सुनिश्चित करेगा कि उपयोग किए जाने वाले सभी उपकरणों/मचान में पर्याप्त स्थिरता हो।

Shall ensure that all equipments/scaffolding used are having adequate stability.

- यह सुनिश्चित करेगा कि इसमें शामिल कर्मियों द्वारा उपयुक्त और पर्याप्त पीपीई प्रदान किए जाते हैं और पहने जाते हैं।

Shall ensure that appropriate and adequate PPEs are provided and worn by the personnel involved.

- यह सुनिश्चित करेगा कि आवश्यकतानुसार गतिविधि/खतरे के लिए उपयुक्त सुरक्षा संकेत रखे गए हैं।
Shall ensure that safety signs are posted as appropriate to the activity/hazard as required.
- साइट से सामग्री को हटाना सुनिश्चित करेगा, जो आवश्यकताओं के अनुरूप नहीं है।
Shall ensure the removal of material from site, which do not conform to the requirements.
- यह सुनिश्चित करेगा कि गतिविधियों के कारण पर्यावरण पर कोई प्रतिकूल प्रभाव न हो ।
Shall ensure no adverse impact on environment due to activities.
- अपने कर्मचारी की गतिविधियों पर उचित करीबी पर्यवेक्षण बनाए रखेगा।
Shall maintain proper close supervision over their employee's activities.
- निष्पादित किए जा रहे कार्य की प्रकृति से संबंधित खतरों की पहचान करेगा और उन खतरों को खत्म करने / नियंत्रित करने के तरीके विकसित करेगा जहां किसी भी अवांछित घटना / दुर्घटना को रोकने के लिए आवश्यक है।
Shall identify the hazards related to their nature of work being executed and develop methods to eliminate/control those hazards where required to prevent any unwanted incidents/accident.
- पूरे काम के दौरान श्रमिकों को शिक्षित / प्रशिक्षित करेगा और उनकी एसएचई जागरूकता में सुधार करेगा।
Shall educate/train the workers throughout the work and improve their SHE awareness.
- पर्याप्त स्वच्छता सुनिश्चित करेगा, (अर्थात् स्वच्छता, धूल और धुएं से मुक्त वातावरण, उचित रोशनी, ठेकेदार द्वारा नियोजित सभी श्रमिकों को और पीने का पानी)।
Shall ensure adequate hygiene, (i.e. cleanliness, environment free from dust and fume, proper lighting and drinking water to all worker employed by the contractor).
- यह सुनिश्चित करेगा कि नियमित जांच/निरीक्षण करके निम्नलिखित के लिए नियमित नियंत्रण हैं, लेकिन निम्नलिखित तक सीमित नहीं हैं:
Shall ensure regular controls are in place for the following by doing regular checks/inspections but not limited to the following:
 - वाहन और उपकरण Vehicles & equipments
 - टूल्स, उपकरण और लिफ्टिंग उपस्कर Tools, equipments, lifting appliances
 - सुरक्षा उपकरण Safety equipments
 - फायर संरक्षण Fire protection
- समय-समय पर अपने खर्च पर और जब भी आवश्यक हो अपने कार्य क्षेत्र से निर्दिष्ट क्षेत्र में सभी कूड़े/स्क्रैप/अवांछित सामग्री को साफ करेगा और हटा देगा।
Shall at his own expenses from time to time and whenever required clear away and remove all rubbish/scrap/unwanted materials from its work area to designated area.
- यदि कार्य से जुड़कर होने वाली सभी घटनाओं/दुर्घटनाओं की रिपोर्ट करेगा। ठेकेदार स्वामी के सुरक्षा विभाग को एक घटना / दुर्घटना रिपोर्ट तैयार करेगा और प्रस्तुत करेगा।
Shall report all incidents/accidents occurring if any connected with the job. The Contractor shall prepare and submit an incident/accident report to OWNER's Safety Department.

काली सूची/अवकाश सूचीकरण की घोषणा का प्रोफार्मा
PROFORMA OF DECLARATION OF BLACK LISTING/HOLIDAY LISTING

मालिकाना संस्था के मामले में In the case of a Proprietary Concern:

मैं एतद्द्वारा घोषणा करता हूं कि न तो मैं अपने व्यक्तिगत नाम पर और न ही अपनी मालिकाना संस्था के नाम पर मैसर्स _____ जो न तो संलग्न बोली/निविदा प्रस्तुत कर रहा है और न ही कोई अन्य संस्था जिसमें मैं मालिक हूं और न ही कोई साझेदारी फर्म जिसमें मैं एक प्रबंध भागीदार के रूप में शामिल हूं, को किसी भी सरकारी सार्वजनिक क्षेत्र की कंपनी (सीपीएसयू) या किसी भी प्रशासनिक मंत्रालय द्वारा घोषित काली सूची या अवकाश सूची में रखा गया है, सिवाय इसके कि नीचे दर्शाया गया है:

I hereby declare that neither I in my personal name or in the name of my Proprietary concern M/s. _____ which is submitting neither the accompanying Bid/Tender nor any other concern in which I am proprietor nor any partnership firm in which I am involved as a Managing Partner have been placed on black list or holiday list declared by any Government Public Sector company (CPSU) or any of the administrative ministries, except as indicated below:

(यहां ब्लैकलिस्टिंग या हॉलिडे लिस्टिंग का विवरण दें, और वहां राज्य की अनुपस्थिति में "शून्य")
 (Here give particulars of blacklisting or holiday listing, and in absence there of state "NIL")

साझेदारी फर्म के मामले में In the case of a Partnership Firm:

हम एतद्द्वारा घोषणा करते हैं कि न तो हम, मैसर्स _____, साथ में बोली / निविदा प्रस्तुत करना और न ही उक्त फर्म के प्रबंधन में शामिल कोई भागीदार या तो उसकी व्यक्तिगत क्षमता में या किसी फर्म या संस्था के मालिक या प्रबंध भागीदार के रूप में किसी भी सरकारी सार्वजनिक क्षेत्र की कंपनी (सीपीएसयू) या किसी भी प्रशासनिक मंत्रालय द्वारा घोषित ब्लैकलिस्ट या हॉलिडे सूची में रखा गया है, सिवाय इसके कि नीचे दर्शाया गया है:

We hereby declare that neither we, M/s. _____, submitting the accompanying Bid/Tender nor any partner involved in the management of the said firm either in his individual capacity or as proprietor or managing partner of any firm or concern have or has been placed on blacklist or holiday list declared by any Government Public Sector Company (CPSU) or any of the administrative ministries, except as indicated below:

(यहां ब्लैकलिस्टिंग या हॉलिडे लिस्टिंग का विवरण दें, और वहां राज्य की अनुपस्थिति में "शून्य")
 (Here give particulars of blacklisting or holiday listing, and in absence there of state "NIL")

कंपनी के मामले में In the case of Company:

हम एतद्द्वारा घोषणा करते हैं कि हमें किसी भी सरकारी सार्वजनिक क्षेत्र की कंपनी (सीपीएसयू) या किसी भी प्रशासनिक मंत्रालय द्वारा घोषित किसी भी अवकाश सूची या काली सूची में नहीं रखा गया है, सिवाय इसके कि नीचे दर्शाया गया है:

We hereby declare that we have not been placed on any holiday list or black list declared by any Government Public Sector Company (CPSU) or any of the administrative ministries, except as indicated below:

(यहां ब्लैकलिस्टिंग या हॉलिडे लिस्टिंग का विवरण दें, और वहां राज्य की अनुपस्थिति में "शून्य")
(Here give particulars of blacklisting or holiday listing, and in absence there of state "NIL")

यह समझा जाता है कि यदि यह घोषणा किसी विशेष रूप से झूठी पाई जाती है, तो हिंदुस्तान ऑर्गेनिक केमिकल्स लिमिटेड या उसके प्रशासनिक मंत्रालय को मेरी/हमारी बोली को अस्वीकार करने का अधिकार होगा, और यदि बोली के परिणामस्वरूप ठेका हुआ है, तो ठेके समाप्त होने के लिए उत्तरदायी हैं।

It is understood that if this declaration is found to be false in any particular, Hindustan Organic Chemicals Limited or its Administrative Ministry, shall have the right to reject my/our bid, and if the bid has resulted in a contract, the contract is liable to be terminated.

ANNEXURE -S

INSTRUCTIONS TO THE CONTRACTORS FOR USE OF VEHICLES

INSTRUCTIONS TO THE CONTRACTORS FOR USE OF VEHICLES, LIFTING MACHINES, LIFTING TOOLS & TACKLES, EARTH MOVING EQUIPMENT AND ENGINE OPERATED EQUIPMENT

1. Lifting machines, chains ropes and lifting tackles

Contractor shall possess valid certificates, for lifting machines, chains blocks, ropes, slings, D-shackles, belts and other lifting tools & tackles used for working inside HOCL, Ambalamugal.

2. Insurance for special type vehicles

Contractor shall possess valid certificates, for vehicles which are used for working inside HOCL, Ambalamugal.

3. Driving License

The Driver/Operator shall possess relevant valid certificates, for vehicles which are used for working inside HOCL, Ambalamugal.

4. Certificate of Fitness

Contractor shall possess valid certificates, for transport vehicles which are used for working inside HOCL, Ambalamugal.

5. Vehicle Entry Permit

Vehicle entry permit shall be taken for use of Mobile equipment inside plant area.

6. Spark Arrestor

Spark arrestor shall be provided for all vehicles / engine operated equipment which are used for working inside plant area.

NOTE:

- 1. The vehicle / mobile equipment brought inside HOCL premises shall be maximum 10 years from the date of registration.**
- 2. Spark ignited equipment (including petrol driven engines) are not permitted inside PESO Licensed area.**

Please note that Mobile Lifting Machines like Mobile cranes, Fork lift, Manlift, Dozers and Excavator shall be allowed to work inside the Factory Premises only after verifying the following:

I. For Mobile Cranes

Shall ensure regular controls are in place for the following by doing regular checks/inspections but not limited to the following:

- a. RTO license for operating crane available
- b. Record of eye examination/re-examination carried out as per Kerala factories Rules 1957
- c. Availability of load chart inside operator cabin in such a way that operator can read and understand load chart.
- d. Condition of hook and latch.
- e. Condition of wire ropes/slings.
- f. Condition of over hoist limit switch (Anti two blocks) and overload alarm.
- g. SWL marked on all hooks.
- h. Tyre condition.
- i. Third party inspection certificate of crane and lifting tools and equipment.
- j. Condition of Horn & Reverse horn.
- k. Condition in hydraulic cylinders and outriggers.
- l. Guards in moving and rotating parts.
- m. Availability of Safe Load indicator (SLI) in operator cabin.

II. For Fork Lift

Shall ensure regular controls are in place for the following by doing regular checks/inspections but not limited to the following:

- a. RTO License for operating Excavator.
- b. Condition of Fork.
- c. Condition in hydraulic cylinders for any leakage.
- d. Tyre condition.
- e. Condition of Horn & Reverse horn.
- f. Condition of overhead guard.

III. For Man Lift

Shall ensure regular controls are in place for the following by doing regular checks/inspections but not limited to the following:

- a. RTO license for operating crane available
- b. Record of eye examination/re-examination carried out as per Kerala factories Rules 1957
- c. Condition of Platform and guard rails.
- d. Condition of main boom and tip boom.
- e. Tyre condition.
- f. Third party inspection certificate of crane and lifting tools and equipment
- g. Condition of Horn & Reverse horn.
- n. Condition in hydraulic cylinders and outriggers.

IV. For Excavator/Dozer

Shall ensure regular controls are in place for the following by doing regular checks/inspections but not limited to the following:

- a. RTO License for operating Excavator.
- b. Condition of Loader bucket.
- c. Condition of Boom.
- d. Hydraulic oil level.
- e. Condition in hydraulic cylinders for any leakage.
- f. Tyre condition.
- g. Condition of Horn & Reverse horn.
- h. Condition of backhoe pins and bushings.
- i. Condition of swing tower.

HINDUSTAN ORGANIC CHEMICALS LIMITED

**MS 001
MANUAL FOR SCAFFOLDING
SEPTEMBER 2023**

ANNEXURE - AC

SCAFFOLDING

Scope, application and definitions

(a) Scope and application. This applies to all scaffolds used in workplaces. It does not apply to crane or derrick suspended personnel platforms.

(b) Definitions.

Adjustable suspension scaffold means a suspension scaffold equipped with a hoist(s) that can be operated by an employee(s) on the scaffold.

Bearer (putlog) means a horizontal trans- verse scaffold member (which may be supported by ledgers or runners) upon which the scaffold platform rests and which joins scaffold uprights, posts, poles, and similar members.

Boatswains' chair means a single-point adjustable suspension scaffold consisting of a seat or sling designed to support one employee in a sitting position.

Body belt (safety belt) means a strap with means both for securing it about the waist and for attaching it to a lanyard, lifeline, or deceleration device.

Body harness means a design of straps which may be secured about the employee in a manner to distribute the fall arrest forces over at least the thighs, pelvis, waist, chest and shoulders, with means for attaching it to other components of a personal fall arrest system.

Brace means a rigid connection that holds one scaffold member in a fixed position with respect to another member, or to a building or structure.

Bricklayers' square scaffold means a supported scaffold

composed of framed squares which support a platform.

Carpenters' bracket scaffold means a supported scaffold consisting of a platform supported by brackets attached to building or structural walls.

Catenary scaffold means a suspension scaffold consisting of a platform supported by two essentially horizontal and parallel ropes attached to structural members of a building or other structure. Additional support may be provided by vertical pickups.

Chimney hoist means a multi-point adjustable suspension scaffold used to provide access to work inside chimneys. (See "Multi-point adjustable suspension scaffold".) **Cleat** means a structural block used at the end of a platform to prevent the platform from slipping off its supports. Cleats are also used to provide footing on sloped surfaces such as crawling boards.

Competent person means one who is capable of identifying existing and predictable hazards in the surroundings or working conditions which are unsanitary, hazardous, or dangerous to employees, and who has authorization to take prompt corrective measures to eliminate them.

Continuous run scaffold (Run scaffold) means a two- point or multi-point adjustable suspension scaffold constructed using a series of interconnected braced scaffold members or supporting structures erected to form a continuous scaffold.

Coupler means a device for locking together the tubes of a tube and coupler scaffold.

Crawling board (chicken ladder) means a supported scaffold consisting of a steel plates/grating with cleats spaced and secured to provide footing, for use on sloped surfaces such as roofs.

Deceleration device means any mechanism, such as a rope grab, rip-stitch lanyard, Specially woven lanyard, tearing or deforming lanyard, or automatic self-retracting lifeline lanyard, which dissipates a substantial amount of energy during a fall arrest or limits the Energy imposed on an employee during fall arrest.

Double pole (independent pole) scaffold means a supported scaffold consisting of a platform(s) resting on cross beams (bearers) supported by ledgers and a double row of uprights independent of support (except ties, guys, braces) from any structure.

Equivalent means alternative designs, materials or methods to protect against a hazard which the employer can demonstrate will provide an equal or greater degree of safety for employees than the methods, materials or designs specified in the standard.

Exposed power lines means electrical power lines which are accessible to employees and which are not shielded from contact. Such lines do not include extension cords or power tool cords.

Eye or Eye splice means a loop with or without a thimble at the end of a wire rope.

Fabricated decking and steel plates/gratings means manufactured platforms made of metal. **Fabricated frame scaffold (tubular welded frame scaffold)** means a scaffold consisting of a platform(s) supported on fabricated end frames with integral posts, horizontal bearers, and intermediate members.

Failure means load refusal, breakage, or separation of component parts. Load refusal is the point where the ultimate strength is exceeded.

Float (ship) scaffold means a suspension scaffold consisting of a

braced platform resting on two parallel bearers and hung from overhead supports by ropes of fixed length.

Form scaffold means a supported scaffold consisting of a platform supported by brackets attached to formwork.

Guardrail system means a vertical barrier, consisting of, but not limited to, top rails, mid rails, and posts, erected to prevent employees from falling off a scaffold platform or walkway to lower levels.

Hoist means a manual or power-operated mechanical device to raise or lower a suspended scaffold.

Horse scaffold means a supported scaffold consisting of a platform supported by construction horses (saw horses). Horse scaffolds constructed of metal are sometimes known as trestle scaffolds.

Independent pole scaffold (see "Double pole scaffold").

Interior hung scaffold means a suspension scaffold consisting of a platform suspended from the ceiling or roof structure by fixed length supports.

Ladder jack scaffold means a supported scaffold consisting of a platform resting on brackets attached to ladders.

Ladder stand means a mobile, fixed-size, self-supporting ladder consisting of a wide flat tread ladder in the form of stairs.

Landing means a platform at the end of a flight of stairs.

Large area scaffold means a pole scaffold,

tube and coupler scaffold, systems scaffold, or fabricated frame scaffold erected over substantially the entire work area. For example: a scaffold erected over the entire floor area of a room.

Lean-to scaffold means a supported scaffold which is kept erect by tilting it toward and resting it against a building or structure.

Lifeline means a component consisting of a flexible line that connects to an anchorage at one end to hang vertically (vertical lifeline), or that connects to anchorages at both ends to stretch horizontally (horizontal lifeline), and which serves as a means for connecting other components of a personal fall arrest system to the anchorage.

Lower levels means areas below the level where the employee is located and to which an employee can fall. Such areas include, but are not limited to, ground levels, floors, roofs, ramps, runways, excavations, pits, tanks, materials, water, and equipment.

Masons' adjustable supported scaffold (see "Self-contained adjustable scaffold"). Masons' multi-point adjustable suspension scaffold means a continuous run suspension scaffold designed and used for masonry operations.

Maximum intended load means the total load of all persons, equipment, tools, materials, transmitted loads, and other loads reasonably anticipated to be applied to a scaffold or scaffold component at any one time.

Mobile scaffold means a powered or unpowered, portable, caster or wheel-mounted supported scaffold.

Multi-level suspended scaffold means a two-point or multi-point adjustable suspension scaffold with a series of platforms at various levels resting on common stirrups.

Multi-point adjustable suspension scaffold means a suspension scaffold consisting of a platform(s) which is suspended by more than two ropes from overhead supports and equipped with means to raise and lower the platform to desired work levels. Such scaf-

folds include chimney hoists.

Needle beam scaffold means a platform suspended from needle beams.

Open sides and ends means the edges of a platform that are more than 14 inches (36 cm) away horizontally from a sturdy, continuous, vertical surface (such as a building wall) or a sturdy, continuous horizontal surface (such as a floor), or a point of access. Exception: For plastering and lathing operations the horizontal threshold distance is 18 inches (46 cm).

Outrigger means the structural member of a supported scaffold used to increase the base width of a scaffold in order to provide support for and increased stability of the scaffold.

Outrigger beam (Thrustout) means the structural member of a suspension scaffold or outrigger scaffold which provides support for the scaffold by extending the scaffold point of attachment to a point out and away from the structure or building.

Outrigger scaffold means a supported scaffold consisting of a platform resting on outrigger beams (thrustouts) projecting beyond the wall or face of the building or structure, the inboard ends of which are secured inside the building or structure.

Overhand bricklaying means the process of laying bricks and masonry units such that the surface of the wall to be jointed is on the opposite side of the wall from the mason, requiring the mason to lean over the wall to complete the work. It includes mason tending and electrical installation incorporated into the brick wall during the overhand bricklaying process.

Personal fall arrest system means a system used to arrest an employee's fall. It consists of an anchorage, connectors, a body belt or body harness and may include a lanyard, deceleration device, lifeline, or combinations of these.

Platform means a work surface elevated above lower levels. Platforms can be constructed using individual steel plates/gratings,

fabricated steel plates/gratings, fabricated decks, and fabricated platforms.

Pole scaffold (see definitions for "Single-pole scaffold" and "Double (independent) pole scaffold").

Power operated hoist means a hoist which is powered by other than human energy.

Pump jack scaffold means a supported scaffold consisting of a platform supported by vertical poles and movable support brackets.

Qualified means one who, by possession of a recognized degree, certificate, or professional standing, or who by extensive knowledge, training, and experience, has successfully demonstrated his/her ability to solve or resolve problems related to the subject matter, the work, or the project.

Rated load means the manufacturer's specified maximum load to be lifted by a hoist or to be applied to a scaffold or scaffold component.

Repair bracket scaffold means a supported scaffold consisting of a platform supported by brackets which are secured in place around the circumference or perimeter of a chimney, stack, tank or other supporting structure by one or more wire ropes placed around the supporting structure.

Roof bracket scaffold means a rooftop supported scaffold consisting of a platform resting on angular-shaped supports.

Runner (ledger or ribbon) means the length-wise horizontal spacing or bracing member which may support the bearers.

Scaffold means any temporary elevated platform (supported or suspended) and its supporting structure (including points of anchorage), used for supporting employees or materials or both.

Self-contained adjustable scaffold means a combination supported and suspension scaffold consisting of an adjustable platform(s) mounted on an independent supporting frame(s) not a part of the object being worked on, and which is equipped with a means to permit the raising and

lowering of the platform(s). Such systems include rolling roof rigs, rolling outrigger systems, and some masons' adjustable supported scaffolds.

Shore scaffold means a supported scaffold which is placed against a building or structure and held in place with props.

Single-point adjustable suspension scaffold means a suspension scaffold consisting of a platform suspended by one rope from an overhead support and equipped with means to permit the movement of the platform to desired work levels. **Single-pole scaffold** means a supported scaffold consisting of a platform(s) resting on bearers, the outside ends of which are supported on runners secured to a single row of posts or uprights, and the inner ends of which are supported on or in a structure or building wall.

Stair tower (Scaffold stairway/tower) means a tower comprised of scaffold components and which contains internal stairway units and rest platforms. These towers are used to provide access to scaffold platforms and other elevated points such as floors and roofs.

Stall load means the load at which the prime-mover of a power-operated hoist stalls or the power to the prime-mover is automatically disconnected.

Step, platform, and trestle ladder scaffold means a platform resting directly on the rungs of step ladders or trestle ladders.

Stilts means a pair of poles or similar supports with raised footrests, used to permit walking above the ground or working surface.

Stonesetters' multi-point adjustable suspension scaffold means a continuous run suspension scaffold designed and used for stonesetters' operations.

Supported scaffold means one or more platforms supported by outrigger beams, brackets, poles, legs, uprights, posts, frames, or similar rigid support.

Suspension scaffold means one or more

platforms suspended by ropes or other non-rigid means from an overhead structure(s).

System scaffold means a scaffold consisting of posts with fixed connection points that accept runners, bearers, and diagonals that can be interconnected at predetermined levels.

Tank builders' scaffold means a supported scaffold consisting of a platform resting on brackets that are either directly attached to a cylindrical tank or attached to devices that are attached to such a tank.

Top plate bracket scaffold means a scaffold supported by brackets that hook over or are attached to the top of a wall. This type of scaffold is similar to carpenters' bracket scaffolds and form scaffolds and is used in residential construction for setting trusses.

Tube and coupler scaffold means a supported or suspended scaffold consisting of a platform(s) supported by tubing, erected with coupling devices connecting uprights, braces, bearers, and runners.

Tubular welded frame scaffold (see "Fabricated frame scaffold").

Two-point suspension scaffold (swing stage) means a suspension scaffold consisting of a platform supported by hangers (stirrups) suspended by two ropes from overhead supports and equipped with means to permit the raising and lowering of the platform to desired work levels.

Unstable objects means items whose strength, configuration, or lack of stability may allow them to become dislocated and shift and therefore may not properly support the loads imposed on them. Unstable objects do not constitute a safe base support for scaffolds, platforms, or employees. Examples include, but are not limited to, barrels, boxes, loose brick, and concrete blocks.

Vertical pickup means a rope used to support the horizontal rope in catenary scaffolds.

Walkway means a portion of a scaffold platform used only for access and not as a work level.

Window jack scaffold means a platform resting on a bracket or jack which projects through a window opening.

General requirements.

This section does not apply to aerial lifts

(a) Capacity

(1) Each scaffold and scaffold component shall be capable of supporting, without failure, its own weight and at least 4 times the maximum intended load applied or transmitted to it.

(2) Direct connections to roofs and floors, and counterweights used to balance adjustable suspension scaffolds, shall be capable of resisting at least 4 times the tipping moment imposed by the scaffold operating at the rated load of the hoist, or 1.5 (minimum) times the tipping moment imposed by the scaffold operating at the stall load of the hoist, whichever is greater.

(3) Each suspension rope, including connecting hardware, used on non-adjustable suspension scaffolds shall be capable of supporting, without failure, at least 6 times the maximum intended load applied or transmitted to that rope.

(4) Each suspension rope, including connecting hardware, used on adjustable suspension scaffolds shall be capable of supporting, without failure, at least 6 times the maximum intended load applied or transmitted to that rope with the scaffold operating at either the rated load of the hoist, or 2 (minimum) times the stall load of the hoist, whichever is greater.

(5) The stall load of any scaffold hoist shall not exceed 3 times its rated load.

(6) Scaffolds shall be designed by a qualified person and shall be constructed and

loaded in accordance with that design. Non-mandatory Appendix A to this subpart contains examples of criteria that will enable an employer to comply with paragraph (a) of this section.

(b) Scaffold platform construction.

(1) Each platform on all working levels of scaffolds shall be fully steel plates/gratings or decked between the front uprights and the guardrail supports as follows:

(i) Each platform unit (e.g., scaffold steel plates/gratings, fabricated steel plates/gratings, fabricated deck, or fabricated platform) shall be installed so that the space between adjacent units and the space between the platform and the uprights is no more than 1 inch (2.5 cm) wide, except where the employer can demonstrate that a wider space is necessary (for example, to fit around uprights when side brackets are used to extend the width of the platform).

(ii) Where the employer makes the demonstration provided for in paragraph (b)(1)(i) of this section, the platform shall be steel plates/gratings or decked as fully as possible and the remaining open space between the platform and the uprights shall not exceed 9 1/2 inches (24.1 cm).

Exception to paragraph (b)(1): The requirement in paragraph (b)(1) to provide full steel plates/gratings or decking does not apply to platforms used solely as walkways or solely by employees performing scaffold erection or dismantling. In these situations, only the steel plates/gratings that the employer establishes is necessary to provide safe working conditions is required.

(2) Except as provided in paragraphs (b)(2)(i) and (b)(2)(ii) of this section, each scaffold platform and walkway shall be at least 18 inches (46 cm) wide.

(i) Each ladder jack scaffold, top plate bracket scaffold, roof bracket scaffold, and pump jack scaffold shall be at least 12 inches (30 cm) wide. There is no minimum width requirement for boatswains' chairs.

(ii) Where scaffolds must be used in areas

that the employer can demonstrate are so narrow that platforms and walkways cannot be at least 18 inches (46 cm) wide, such platforms and walkways shall be as wide as feasible, and employees on those platforms and walkways shall be protected from fall hazards by the use of guardrails and/or personal fall arrest systems.

(3) Except as provided in paragraphs (b)(3)(i) and (b)(3)(ii) of this section, the front edge of all platforms shall not be more than 14 inches (36 cm) from the face of the work, unless guardrail systems are erected along the front edge and/or personal fall arrest systems are used in accordance with paragraph (g) of this section to protect employees from falling.

(i) The maximum distance from the face for outrigger scaffolds shall be 3 inches (8 cm);
(ii) The maximum distance from the face for plastering and lathing operations shall be 18 inches (46 cm).

(4) Each end of a platform, unless cleated or otherwise restrained by hooks or equivalent means, shall extend over the centerline of its support at least 6 inches (15 cm).

(5)(i) Each end of a platform 10 feet or less in length shall not extend over its support more than 12 inches (30 cm) unless the platform is designed and installed so that the cantilevered portion of the platform is able to support employees and/or materials without tipping, or has guardrails which block employee access to the cantilevered end.

(ii) Each platform greater than 10 feet in length shall not extend over its support more than 18 inches (46 cm), unless it is designed and installed so that the cantilevered portion of the platform is able to support employees without tipping, or has guardrails which block employee access to the cantilevered end.

(6) On scaffolds where scaffold steel plates/gratings are abutted to create a long platform, each

abutted end shall rest on a separate support surface. This provision does not preclude the use of common support members, such as "T" sections, to support abutting steel plates/gratings, or hook on platforms designed to rest on common supports.

(7) On scaffolds where platforms are overlapped to create a long platform, the overlap shall occur only over supports, and shall not be less than 12 inches (30 cm) unless the platforms are nailed together or otherwise restrained to prevent movement.

(8) At all points of a scaffold where the platform changes direction, such as turning a corner, any platform that rests on a bearer at an angle other than a right angle shall be laid first, and platforms which rest at right angles over the same bearer shall be laid second, on top of the first platform.

(9) Platforms may be coated periodically with fire-retardant finishes and slip-resistant finishes.

(10) Scaffold components manufactured by different manufacturers shall not be intermixed unless the components fit together without force and the scaffold's structural integrity is maintained by the user. Scaffold components manufactured by different manufacturers shall not be modified in order to intermix them unless a competent person determines the resulting scaffold is structurally sound.

(11) Scaffold components made of dissimilar metals shall not be used together unless a competent person has determined that galvanic action will not reduce the strength of any component to a level below that required by paragraph (a)(1) of this section.

(c) Criteria for supported scaffolds.

(1) Supported scaffolds with a height to

base width (including outrigger supports, if used) ratio of more than four to one (4:1) shall be restrained from tipping by guying, tying, bracing, or equivalent means, as follows:

(i) Guys, ties, and braces shall be installed at locations where horizontal members support both inner and outer legs.

(ii) Guys, ties, and braces shall be installed according to the scaffold manufacturer's recommendations or at the closest horizontal member to the 4:1 height and be repeated vertically at locations of horizontal members every 20 feet (6.1 m) or less thereafter for scaffolds 3 feet (0.91 m) wide or less, and every 26 feet (7.9 m) or less thereafter for scaffolds greater than 3 feet (0.91 m) wide. The top guy, tie or brace of completed scaffolds shall be placed no further than the 4:1 height from the top. Such guys, ties and braces shall be installed at each end of the scaffold and at horizontal intervals not to exceed 30 feet (9.1 m) (measured from one end [not both] towards the other).

(iii) Ties, guys, braces, or outriggers shall be used to prevent the tipping of supported scaffolds in all circumstances where an eccentric load, such as a cantilevered work platform, is applied or is transmitted to the scaffold.

(2) Supported scaffold poles, legs, posts, frames, and uprights shall bear on base plates and mud sills or other adequate firm foundation.

(i) Footings shall be level, sound, rigid, and capable of supporting the loaded scaffold without settling or displacement.

(ii) Unstable objects shall not be used to support scaffolds or platform units.

(iii) Unstable objects shall not be used as working platforms.

(iv) Front-end loaders and similar pieces of equipment shall not be used to support scaffold platforms unless they have been specifically designed by the manufacturer for such use.

(v) Fork-lifts shall not be used to support scaffold platforms unless the entire platform is attached to the fork and the fork-lift is not moved horizontally while the platform is occupied.

(3) Supported scaffold poles, legs, posts, frames, and uprights shall be plumb and braced to prevent swaying and displacement.

(d) Criteria for suspension scaffolds.

(1) All suspension scaffold support devices, such as outrigger beams, cornice hooks, parapet clamps, and similar devices, shall rest on surfaces capable of supporting at least 4 times the load imposed on them by the scaffold operating at the rated load of the hoist (or at least 1.5 times the load imposed on them by the scaffold at the stall capacity of the hoist, whichever is greater).

(2) Suspension scaffold outrigger beams, when used, shall be made of structural metal or equivalent strength material, and shall be restrained to prevent movement.

(3) The inboard ends of suspension scaffold outrigger beams shall be stabilized by bolts or other direct connections to the floor or roof deck, or they shall have their inboard ends stabilized by counterweights, except masons' multi-point adjustable suspension scaffold outrigger beams shall not be stabilized by counterweights.

(i) Before the scaffold is used, direct connections shall be evaluated by a competent person who shall confirm, based on the evaluation, that the supporting surfaces are capable of supporting the loads to be imposed. In addition, masons' multi-point adjustable suspension scaffold connections shall be designed by an engineer experienced in such scaffold design.

(ii) Counterweights shall be made of non-flowable material. Sand, gravel and similar materials that can be easily dislocated shall not be used as counterweights.

(iii) Only those items specifically designed

as counterweights shall be used to counterweight scaffold systems. Construction materials such as, but not limited to, masonry units and rolls of roofing felt, shall not be used as counterweights.

(iv) Counterweights shall be secured by mechanical means to the outrigger beams to prevent accidental displacement.

(v) Counterweights shall not be removed from an outrigger beam until the scaffold is disassembled.

(vi) Outrigger beams which are not stabilized by bolts or other direct connections to the floor or roof deck shall be secured by tiebacks.

(vii) Tiebacks shall be equivalent in strength to the suspension ropes.

(viii) Outrigger beams shall be placed perpendicular to its bearing support (usually the face of the building or structure). However, where the employer can demonstrate that it is not possible to place an outrigger beam perpendicular to the face of the building or structure because of obstructions that cannot be moved, the outrigger beam may be placed at some other angle, provided opposing angle tiebacks are used.

(ix) Tiebacks shall be secured to a structurally sound anchorage on the building or structure. Sound anchorages include structural members, but do not include standpipes, vents, other piping systems, or electrical conduit.

(x) Tiebacks shall be installed perpendicular to the face of the building or structure, or opposing angle tiebacks shall be installed. Single tiebacks installed at an angle are prohibited.

(4) Suspension scaffold outrigger beams shall be:

(i) Provided with stop bolts or shackles at both ends;

(ii) Securely fastened together with the flanges turned out when channel iron beams are used in place of I-beams;

(iii) Installed with all bearing supports perpendicular to the beam centerline;

- (iv) Set and maintained with the web in a vertical position; and
- (v) When an outrigger beam is used, the shackle or clevis with which the rope is attached to the outrigger beam shall be placed directly over the center line of the stirrup.
- (5) Suspension scaffold support devices such as cornice hooks, roof hooks, roof irons, parapet clamps, or similar devices shall be:
 - (i) Made of steel, wrought iron, or materials of equivalent strength;
 - (ii) Supported by bearing blocks; and
 - (iii) Secured against movement by tiebacks installed at right angles to the face of the building or structure, or opposing angle tiebacks shall be installed and secured to a structurally sound point of anchorage on the building or structure. Sound points of anchorage include structural members, but do not include standpipes, vents, other piping systems, or electrical conduit.
 - (iv) Tiebacks shall be equivalent in strength to the hoisting rope.
- (6) When winding drum hoists are used on a suspension scaffold, they shall contain not less than four wraps of the suspension rope at the lowest point of scaffold travel. When other types of hoists are used, the suspension ropes shall be long enough to allow the scaffold to be lowered to the level below without the rope end passing through the hoist, or the rope end shall be configured or provided with means to prevent the end from passing through the hoist.
- (7) The use of repaired wire rope as suspension rope is prohibited.
- (8) Wire suspension ropes shall not be joined together except through the use of eye splice thimbles connected with shackles or coverplates and bolts.
- (9) The load end of wire suspension ropes shall be equipped with proper size thimbles and secured by eyesplicing or equivalent means.
- (10) Ropes shall be inspected for defects by

- a competent person prior to each work shift and after every occurrence which could affect a rope's integrity. Ropes shall be replaced if any of the following conditions exist:
- (i) Any physical damage which impairs the function and strength of the rope.
 - (ii) Kinks that might impair the tracking or wrapping of rope around the drum(s) or sheave(s).
 - (iii) Six randomly distributed broken wires in one rope lay or three broken wires in one strand in one rope lay.
 - (iv) Abrasion, corrosion, scrubbing, flattening or peening causing loss of more than one-third of the original diameter of the outside wires.
 - (v) Heat damage caused by a torch or any damage caused by contact with electrical wires.
 - (vi) Evidence that the secondary brake has been activated during an overspeed condition and has engaged the suspension rope.
 - (11) Swaged attachments or spliced eyes on wire suspension ropes shall not be used unless they are made by the wire rope manufacturer or a qualified person.
 - (12) When wire rope clips are used on suspension scaffolds:
 - (i) There shall be a minimum of 3 wire rope clips installed, with the clips a minimum of 6 rope diameters apart;
 - (ii) Clips shall be installed according to the manufacturer's recommendations;
 - (iii) Clips shall be retightened to the manufacturer's recommendations after the initial loading;
 - (iv) Clips shall be inspected and retightened to the manufacturer's recommendations at the start of each workshift thereafter;
 - (v) U-bolt clips shall not be used at the point of suspension for any scaffold hoist;
 - (vi) When U-bolt clips are used, the U-bolt shall be placed over the dead end of the rope, and the saddle shall be placed over the live end of the rope.
 - (13) Suspension scaffold power-operated

hoists and manual hoists shall be tested by a qualified testing laboratory.

(14) Gasoline-powered equipment and hoists shall not be used on suspension scaffolds.

(15) Gears and brakes of power-operated hoists used on suspension scaffolds shall be enclosed.

(16) In addition to the normal operating brake, suspension scaffold power-operated hoists and manually operated hoists shall have a braking device or locking pawl which engages automatically when a hoist makes either of the following uncontrolled movements: an instantaneous change in momentum or an accelerated overspeed.

(17) Manually operated hoists shall require a positive crank force to descend.

(18) Two-point and multi-point suspension scaffolds shall be tied or otherwise secured to prevent them from swaying, as determined to be necessary based on an evaluation by a competent person. Window cleaners' anchors shall not be used for this purpose.

(19) Devices whose sole function is to provide emergency escape and rescue shall not be used as working platforms. This provision does not preclude the use of systems which are designed to function both as suspension scaffolds and emergency systems.

(e) Access.

This paragraph applies to scaffold access for all employees. Access requirements for employees erecting or dismantling supported scaffolds are specifically addressed in paragraph (e)(9) of this section.

(1) When scaffold platforms are more than 2 feet (0.6 m) above or below a point of access, portable ladders, hook-on ladders, attachable ladders, stair towers (scaffold stairways/towers), stairway-type ladders (such as ladder stands), ramps, walkways, integral prefabricated scaffold access, or

direct access from another scaffold, structure, personnel hoist, or similar surface shall be used. Crossbraces shall not be used as a means of access.

(2) Portable, hook-on, and attachable ladders (Additional requirements for the proper construction and use of portable ladders are contained in subpart X of this part—Stairways and Ladders):

(i) Portable, hook-on, and attachable ladders shall be positioned so as not to tip the scaffold;

(ii) Hook-on and attachable ladders shall be positioned so that their bottom rung is not more than 24 inches (61 cm) above the scaffold supporting level;

(iii) When hook-on and attachable ladders are used on a supported scaffold more than 35 feet (10.7 m) high, they shall have rest platforms at 35-foot (10.7 m) maximum vertical intervals.

(iv) Hook-on and attachable ladders shall be specifically designed for use with the type of scaffold used;

(v) Hook-on and attachable ladders shall have a minimum rung length of 11 1/2 inches (29 cm); and

(vi) Hook-on and attachable ladders shall have uniformly spaced rungs with a maximum spacing between rungs of 16 3/4 inches.

(3) Stairway-type ladders shall:

(i) Be positioned such that their bottom step is not more than 24 inches (61 cm) above the scaffold supporting level;

(ii) Be provided with rest platforms at 12 foot (3.7 m) maximum vertical intervals;

(iii) Have a minimum step width of 16 inches (41 cm), except that mobile scaffold stairway-type ladders shall have a minimum step width of 11 1/2 inches (30 cm); and

(iv) Have slip-resistant treads on all steps and landings.

(4) Stairtowers (scaffold stairway/ towers) shall be positioned such that their bottom step is not more than 24 inches (61 cm.) above the scaffold supporting level.

- (i) A stairrail consisting of a top rail and a mid rail shall be provided on each side of each scaffold stairway.
- (ii) The top rail of each stair rail system shall also be capable of serving as a handrail, unless a separate handrail is provided.
- (iii) Handrails, and top rails that serve as handrails, shall provide an adequate handhold for employees grasping them to avoid falling.
- (iv) Stair rail systems and handrails shall be surfaced to prevent injury to employees from punctures or lacerations, and to prevent snagging of clothing.
- (v) The ends of stair rail systems and handrails shall be constructed so that they do not constitute a projection hazard.
- (vi) Handrails, and top rails that are used as handrails, shall be at least 3 inches (7.6 cm) from other objects.
- (vii) Stair rails shall be not less than 28 inches (71 cm) nor more than 37 inches (94 cm) from the upper surface of the stair rail to the surface of the tread, in line with the face of the riser at the forward edge of the tread.
- (viii) A landing platform at least 18 inches (45.7 cm) wide by at least 18 inches (45.7 cm) long shall be provided at each level.
- (ix) Each scaffold stairway shall be at least 18 inches (45.7 cm) wide between stair rails.
- (x) Treads and landings shall have slip-resistant surfaces.
- (xi) Stairways shall be installed between 40 degrees and 60 degrees from the horizontal.
- (xii) Guardrails meeting the requirements of paragraph (g)(4) of this section shall be provided on the open sides and ends of each landing.
- (xiii) Riser height shall be uniform, within 1/4 inch, (0.6 cm) for each flight of stairs. Greater variations in riser height are allowed for the top and bottom steps of the entire system, not for each flight of stairs.
- (xiv) Tread depth shall be uniform, within 1/4 inch, for each flight of stairs.
- (5) Ramps and walkways.
- (i) Ramps and walkways 6 feet (1.8 m) or more above lower levels shall have guardrail systems

- which comply with subpart M of this part—Fall Protection;
- (ii) No ramp or walkway shall be inclined more than a slope of one (1) vertical to three (3) horizontal (20 degrees above the horizontal).
- (iii) If the slope of a ramp or a walkway is steeper than one (1) vertical in eight (8) horizontal, the ramp or walkway shall have cleats not more than fourteen (14) inches (35 cm) apart which are securely fastened to the steel plates/gratings to provide footing.
- (6) Integral prefabricated scaffold access frames shall:
 - (i) Be specifically designed and constructed for use as ladder rungs;
 - (ii) Have a rung length of at least 8 inches (20 cm);
 - (iii) Not be used as work platforms when rungs are less than 11 1/2 inches in length, unless each affected employee uses fall protection, or a positioning device
 - (iv) Be uniformly spaced within each frame section;
 - (v) Be provided with rest platforms at 35-foot (10.7 m) maximum vertical intervals on all supported scaffolds more than 35 feet (10.7 m) high; and
 - (vi) Have a maximum spacing between rungs of 16 3/4 inches (43 cm). Non-uniform rung spacing caused by joining end frames together is allowed, provided the resulting spacing does not exceed 16 3/4 inches (43 cm).
- (7) Steps and rungs of ladder and stairway type access shall line up vertically with each other between rest platforms.
- (8) Direct access to or from another surface shall be used only when the scaffold is not more than 14 inches (36 cm) horizontally and not more than 24 inches (61 cm) vertically from the other surface.
- (9) Effective September 2, 1997, access for employees erecting or dismantling supported scaffolds shall be in accordance with the following:
 - (i) The employer shall provide safe means of

access for each employee erecting or dismantling a scaffold where the provision of safe access is feasible and does not create a greater hazard.

The employer shall have a competent person determine whether it is feasible or would pose a greater hazard to provide, and have employees use a safe means of access. This determination shall be based on site conditions and the type of scaffold being erected or dismantled.

(ii) Hook-on or attachable ladders shall be installed as soon as scaffold erection has progressed to a point that permits safe installation and use.

(iii) When erecting or dismantling tubular welded frame scaffolds, (end) frames, with horizontal members that are parallel, level and are not more than 22 inches apart vertically may be used as climbing devices for access, provided they are erected in a manner that creates a usable ladder and provides good hand hold and foot space.

(iv) Cross braces on tubular welded frame scaffolds shall not be used as a means of access or egress.

loads or rated capacities, whichever is less.

(2) The use of shore or lean-to scaffolds is prohibited.

(3) Scaffolds and scaffold components shall be inspected for visible defects by a competent person before each work shift, and after any occurrence which could affect a scaffold's structural integrity.

(4) Any part of a scaffold damaged or weakened such that its strength is less than that required by paragraph (a) of this section shall be immediately repaired or replaced, braced to meet those provisions, or removed from service until repaired.

(5) Scaffolds shall not be moved horizontally while employees are on them.

(6) The clearance between scaffolds and power lines shall be as follows: Scaffolds shall not be erected, used, dismantled, altered, or moved such that they or any conductive material handled on them might come closer to exposed and energized power lines than as follows:

(f) Use

(1) Scaffolds and scaffold components shall not be loaded in excess of their maximum intended

Insulated lines voltage	Minimum distance	Alternatives
Less than 300 volts	3 feet (0.9 M).	
300 volts to 50 kv.....	10 feet (3.1 m)	
More than 50 kv	10 feet (3.1 M) plus .4 inches (1.0 cm) for each 1 kv over 50 kv.	2 times the length of the line insulator, but never less than 10 feet (3.1 m).
Uninsulated lines voltage	Minimum distance	Alternatives
Less than 50 kv	10 feet (3.1 M).	
More than 50 kv	10 feet (3.1 M) plus .4 inches (1.0 cm) for each 1 kv over 50 kv.	2 times the length of the line insulator, but never less than 10 feet (3.1 m).

Exception to paragraph (f)(6): Scaffolds and materials may be closer to power lines than specified above where such clearance is necessary for performance of work, and only after the utility company, or electrical system operator, has been notified of the need to work closer and the utility company, or electrical system operator, has deenergized the lines, relocated the lines, or installed protective coverings to prevent accidental contact with the lines.

(7) Scaffolds shall be erected, moved, dismantled, or altered only under the supervision and direction of a competent person qualified in scaffold erection, moving, dismantling or alteration. Such activities shall be performed only by experienced and trained employees selected for such work by the competent person.

(8) Employees shall be prohibited from working on scaffolds covered with snow, ice, or other slippery material except as necessary for removal of such materials.

(9) Where swinging loads are being hoisted onto or near scaffolds such that the loads might contact the scaffold, tag lines or equivalent measures to control the loads shall be used.

(10) Suspension ropes supporting adjustable suspension scaffolds shall be of a diameter large enough to provide sufficient surface area for the functioning of brake and hoist mechanisms.

(11) Suspension ropes shall be shielded from heat-producing processes. When acids or other corrosive substances are used on a scaffold, the ropes shall be shielded, treated to protect against the corrosive substances, or shall be of a material that will not be damaged by the substance being used.

(12) Work on or from scaffolds is prohibited during storms or high winds unless a competent person has determined that it is safe for employees to be on the scaffold and those employees are protected by a personal fall arrest system or wind screens. Wind screens shall not be used unless the

scaffold is secured against the anticipated wind forces imposed.

(13) Debris shall not be allowed to accumulate on platforms.

(14) Makeshift devices, such as but not limited to boxes and barrels, shall not be used on top of scaffold platforms to increase the working level height of employees.

(15) Ladders shall not be used on scaffolds to increase the working level height of employees, except on large area scaffolds where employers have satisfied the following criteria:

(i) When the ladder is placed against a structure which is not a part of the scaffold, the scaffold shall be secured against the sideways thrust exerted by the ladder;

(ii) The platform units shall be secured to the scaffold to prevent their movement;

(iii) The ladder legs shall be on the same platform or other means shall be provided to stabilize the ladder against unequal platform deflection, and

(iv) The ladder legs shall be secured to prevent them from slipping or being pushed off the platform.

(16) Platforms shall not deflect more than 1/60 of the span when loaded.

(17) To reduce the possibility of welding current arcing through the suspension wire rope when performing welding from suspended scaffolds, the following precautions shall be taken, as applicable:

(i) An insulated thimble shall be used to attach each suspension wire rope to its hanging support (such as cornice hook or outrigger). Excess suspension wire rope and any additional independent lines from grounding shall be insulated;

(ii) The suspension wire rope shall be covered with insulating material extending at least 4 feet (1.2 m) above the hoist. If there is a tail line below the hoist, it shall be insulated to prevent contact with the platform. The portion of the tail line that hangs free below the scaffold shall be guided or retained, or both, so that it does not become

grounded;

(iii) Each hoist shall be covered with insulated protective covers;

(iv) In addition to a work lead attachment required by the welding process, a grounding conductor shall be connected from the scaffold to the structure. The size of this conductor shall be at least the size of the welding process work lead, and this conductor shall not be in series with the welding process or the workpiece;

(v) If the scaffold grounding lead is disconnected at any time, the welding machine shall be shut off; and

(vi) An active welding rod or uninsulated welding lead shall not be allowed to contact the scaffold or its suspension system.

(g) Fall protection.

(1) Each employee on a scaffold more than 10 feet (3.1 m) above a lower level shall be protected from falling to that lower level. Paragraphs (g)(1) (i) through (vii) of this section establish the types of fall protection to be provided to the employees on each type of scaffold. Paragraph (g)(2) of this section addresses fall protection for scaffold erectors and dismantlers.

Note to paragraph (g)(1): The fall protection requirements for employees installing suspension scaffold support systems on floors, roofs, and other elevated surfaces are set forth in subpart M of this part.

(i) Each employee on a boatswains' chair, catenary scaffold, float scaffold, needle beam scaffold, or ladder jack scaffold shall be protected by a personal fall arrest system;

(ii) Each employee on a single-point or two-point adjustable suspension scaffold shall be protected by both a personal fall arrest system and guardrail system;

(iii) Each employee on a crawling board (chicken ladder) shall be protected by a personal fall arrest system, a guardrail system (with minimum 200 pound toprail

capacity), or by a three-fourth inch (1.9 cm) diameter gripline or equivalent handhold securely fastened beside each crawling board;

(iv) Each employee on a self-contained adjustable scaffold shall be protected by a guardrail system (with minimum 200 pound toprail capacity) when the platform is supported by the frame structure, and by both a personal fall arrest system and a guardrail system (with minimum 200 pound toprail capacity) when the platform is supported by ropes;

(v) Each employee on a walkway located within a scaffold shall be protected by a guardrail system (with minimum 200 pound toprail capacity) installed within 9 1/2 inches (24.1 cm) of and along at least one side of the walkway.

(vi) Each employee performing overhand bricklaying operations from a supported scaffold shall be protected from falling from all open sides and ends of the scaffold (except at the side next to the wall being laid) by the use of a personal fall arrest system or guardrail system (with minimum 200 pound toprail capacity).

(vii) For all scaffolds not otherwise specified in paragraphs (g)(1)(i) through (g)(1)(vi) of this section, each employee shall be protected by the use of personal fall arrest systems or guardrail systems meeting the requirements of paragraph (g)(4) of this section.

(2) Effective September 2, 1997, the employer shall have a competent person determine the feasibility and safety of providing fall protection for employees erecting or dismantling supported scaffolds. Employers are required to provide fall protection for employees erecting or dismantling supported scaffolds where the installation and use of such protection is feasible and does not create a greater hazard.

(3) Personal fall arrest systems used on scaffolds shall be attached by

lanyard to a vertical lifeline, horizontal lifeline, or scaffold structural member. Vertical lifelines shall not be used when overhead components, such as overhead protection or additional platform levels, are part of a single-point or two-point adjustable suspension scaffold.

(i) When vertical lifelines are used, they shall be fastened to a fixed safe point of anchorage, shall be independent of the scaffold, and shall be protected from sharp edges and abrasion. Safe points of anchorage include structural members of buildings, but do not include standpipes, vents, other piping systems, electrical conduit, outrigger beams, or counterweights.

(ii) When horizontal lifelines are used, they shall be secured to two or more structural members of the scaffold, or they may be looped around both suspension and independent suspension lines (on scaffolds so equipped) above the hoist and brake attached to the end of the scaffold. Horizontal lifelines shall not be attached only to the suspension ropes.

(iii) When lanyards are connected to horizontal lifelines or structural members on a single-point or two-point adjustable suspension scaffold, the scaffold shall be equipped with additional independent support lines and automatic locking devices capable of stopping the fall of the scaffold in the event one or both of the suspension ropes fail. The independent support lines shall be equal in number and strength to the suspension ropes.

(iv) Vertical lifelines, independent support lines, and suspension ropes shall not be attached to each other, nor shall they be attached to or use the same point of anchorage, nor shall they be attached to the same point on the scaffold or personal fall arrest system.

(3) Guardrail systems installed to meet the requirements of this section shall comply with the following provisions (guardrail systems built in accordance with Appendix

A to this subpart will be deemed to meet the requirements of paragraphs (g)(4) (vii), (viii), and (ix) of this section):

(i) Guardrail systems shall be installed along all open sides and ends of platforms. Guardrail systems shall be installed before the scaffold is released for use by employees other than erection/dismantling crews.

(ii) The top edge height of top rails or equivalent member on supported scaffolds manufactured or placed in service after January 1, 2000 shall be installed between 38 inches (0.97 m) and 45 inches (1.2 m) above the platform surface. The top edge height on supported scaffolds manufactured and placed in service before January 1, 2000, and on all suspended scaffolds where both a guardrail and a personal fall arrest system are required shall be between 36 inches (0.9 m) and 45 inches (1.2 m). When conditions warrant, the height of the top edge may exceed the 45-inch height, provided the guardrail system meets all other criteria of paragraph (g)(4).

(iii) When midrails, screens, mesh, intermediate vertical members, solid panels, or equivalent structural members are used, they shall be installed between the top edge of the guardrail system and the scaffold platform.

(iv) When midrails are used, they shall be installed at a height approximately midway between the top edge of the guardrail system and the platform surface.

(v) When screens and mesh are used, they shall extend from the top edge of the guardrail system to the scaffold platform, and along the entire opening between the supports.

(vi) When intermediate members (such as balusters or additional rails) are used, they shall not be more than 19 inches (48 cm) apart.

(vii) Each top rail or equivalent member of a guardrail system shall be capable of withstanding, without failure, a force applied in any downward or horizontal direction at any

point along its top edge of at least 100 pounds (445 n) for guardrail systems installed on single-point adjustable suspension scaffolds or two-point adjustable suspension scaffolds, and at least 200 pounds (890 n) for guardrail systems installed on all other scaffolds.

(viii) When the loads specified in paragraph (g)(4)(vii) of this section are applied in a downward direction, the top edge shall not drop below the height above the platform surface that is prescribed in paragraph (g)(4)(ii) of this section.

(ix) Midrails, screens, mesh, intermediate vertical members, solid panels, and equivalent structural members of a guardrail system shall be capable of withstanding, without failure, a force applied in any downward or horizontal direction at any point along the midrail or other member of at least 75 pounds (333 n) for guardrail systems with a minimum 100 pound top rail capacity, and at least 150 pounds (666 n) for guardrail systems with a minimum 200 pound top rail capacity.

(x) Suspension scaffold hoists and non-walk-through stirrups may be used as end guardrails, if the space between the hoist or stirrup and the side guardrail or structure does not allow passage of an employee to the end of the scaffold.

(xi) Guardrails shall be surfaced to prevent injury to an employee from punctures or lacerations, and to prevent snagging of clothing.

(xii) The ends of all rails shall not overhang the terminal posts except when such overhang does not constitute a projection hazard to employees.

(xiii) Steel or plastic banding shall not be used as a top rail or midrail.

(xiv) Manila or plastic (or other synthetic) rope being used for top rails or midrails shall be inspected by a competent person as frequently as necessary to ensure that it continues to meet the strength requirements of paragraph (g) of this section.

(xv) Crossbracing is acceptable in place of a midrail when the crossing point of two braces is between 20 inches (0.5 m) and 30 inches (0.8 m) above the work platform or as a top rail when the crossing point of two braces is between 38 inches (0.97 m) and 48 inches (1.3 m) above the work platform. The end points at each upright shall be no more than 48 inches (1.3 m) apart.

(h) Falling object protection.

(1) In addition to wearing hardhats each employee on a scaffold shall be provided with additional protection from falling hand tools, debris, and other small objects through the installation of toeboards, screens, or guardrail systems, or through the erection of debris nets, catch platforms, or canopy structures that contain or deflect the falling objects. When the falling objects are too large, heavy or massive to be contained or deflected by any of the above-listed measures, the employer shall place such potential falling objects away from the edge of the surface from which they could fall and shall secure those materials as necessary to prevent their falling.

(2) Where there is a danger of tools, materials, or equipment falling from a scaffold and striking employees below, the following provisions apply:

(i) The area below the scaffold to which objects can fall shall be barricaded, and employees shall not be permitted to enter the hazard area; or

(ii) A toeboard shall be erected along the edge of platforms more than 10 feet (3.1 m) above lower levels for a distance sufficient to protect employees below.

(iii) Where tools, materials, or equipment are piled to a height higher than the top edge of the toeboard, paneling or screening extending from the toeboard or platform to the top of

the guardrail shall be erected for a distance sufficient to protect employees below; or

(iv) A guardrail system shall be installed with openings small enough to prevent passage of potential falling objects; or

(v) A canopy structure, debris net, or catch platform strong enough to withstand the impact forces of the potential falling objects shall be erected over the employees below.

(3) Canopies, when used for falling object protection, shall comply with the following criteria:

(i) Canopies shall be installed between the falling object hazard and the employees.

(ii) When canopies are used on suspension scaffolds for falling object protection, the scaffold shall be equipped with additional independent support lines equal in number to the number of points supported, and equivalent in strength to the strength of the suspension ropes.

(iii) Independent support lines and suspension ropes shall not be attached to the same points of anchorage.

(4) Where used, toeboards shall be:

(i) Capable of withstanding, without failure, a force of at least 50 pounds (222 N) applied

in any downward or horizontal direction at any point along the toeboard (toeboards built in accordance with Appendix A to this subpart will be deemed to meet this requirement); and

(ii) At least three and one-half inches (9 cm) high from the top edge of the toeboard to the level of the walking/working surface. Toeboards shall be securely fastened in place at the outermost edge of the platform and have not more than 1/4 inch (0.7 cm) clearance above the walking/working surface. Toeboards shall be solid or with openings not over one inch (2.5 cm) in the greatest dimension.

Additional requirements applicable to specific types of scaffolds.

(a) Tube and coupler scaffolds.

(1) When platforms are being moved to the next level, the existing platform shall be left undisturbed until the new bearers have been set in place and braced prior to receiving the new platforms.

(2) Transverse bracing forming an "X" across the width of the scaffold shall be installed at the scaffold ends and at least at every third set of posts horizontally (measured from only one end) and every fourth runner vertically. Bracing shall extend diagonally from the inner or outer posts or runners upward to the next outer or inner posts or runners. Building ties shall be installed at the bearer levels between the transverse bracing

(3) On straight run scaffolds, longitudinal bracing across the inner and outer rows of posts shall be installed diagonally in both directions, and shall extend from the base of the end posts upward to the top of the scaffold at approximately a 45 degree angle. On scaffolds whose length is greater than their height, such bracing shall be repeated beginning at least at every fifth post. On scaffolds whose length is less than their height, such bracing shall be installed from the base of the end posts upward to the opposite end posts, and then in alternating directions until reaching the top of the scaffold. Bracing shall be installed as close as possible to the intersection of the bearer and post or runner and post.

(4) Where conditions preclude the attachment of bracing to posts, bracing shall be attached to the runners as close to the post as possible.

(5) Bearers shall be installed transversely between posts, and when coupled to the posts, shall have the inboard coupler bear directly on the runner coupler. When the bearers are coupled to the runners, the couplers shall be as close to the posts as possible.

(6) Bearers shall extend beyond the posts and runners, and shall provide full contact with the coupler.

(7) Runners shall be installed along the length of the scaffold, located on both the inside and outside posts at level heights (when tube and coupler guardrails and midrails are used on outside posts, they may be used in lieu of outside runners).

(8) Runners shall be interlocked on straight runs to form continuous lengths, and shall be coupled to each post. The bottom runners and bearers shall be located as close to the base as possible.

(9) Couplers shall be of a structural metal, such as drop-forged steel, malleable iron, or structural grade aluminum. The use of gray cast iron is prohibited.

(10) Tube and coupler scaffolds over 125 feet (38 m) in height shall be designed by a registered professional engineer, and shall be constructed and loaded in accordance with such design. Non-mandatory Appendix A to this subpart contains examples of criteria that will enable an employer to comply with design and loading requirements for tube and coupler scaffolds under 125 feet (38 m) in height.

(b) Fabricated frame scaffolds (tubular welded frame scaffolds).

(1) When moving platforms to the next level, the existing platform shall be left undisturbed until the new end frames have been set in place and braced prior to receiving the new platforms.

(2) Frames and panels shall be braced by cross, horizontal, or diagonal braces, or combination thereof, which secure vertical members together laterally. The cross braces shall be of such length as will automatically square and align vertical members so that the erected scaffold is always plumb, level, and square. All brace connections shall be secured.

(3) Frames and panels shall be joined together vertically by coupling or stacking

pins or equivalent means.

(4) Where uplift can occur which would displace scaffold end frames or panels, the frames or panels shall be locked together vertically by pins or equivalent means.

(5) Brackets used to support cantilevered loads shall:

(i) Be seated with side-brackets parallel to the frames and end-brackets at 90 degrees to the frames;

(ii) Not be bent or twisted from these positions; and

(c) Be used only to support personnel, unless the scaffold has been designed for other loads by a qualified engineer and built to withstand the tipping forces caused by those other loads being placed on the bracket-supported section of the scaffold. **(6)** Scaffolds over 125 feet (38.0 m) in height above their base plates shall be designed by a registered professional engineer, and shall be constructed and loaded in accordance with such design.

Plasterers', decorators', and large area scaffolds. Scaffolds shall be constructed in accordance with paragraphs (a), (b), or (c) of this section, as appropriate.

(d) Bricklayers' square scaffolds (squares).

(1) Diagonal braces shall be installed on all sides of each square.

(2) Diagonal braces shall be installed between squares on the rear and front sides of the scaffold, and shall extend from the bottom of each square to the top of the next square.

(3) Scaffolds shall not exceed three tiers in height, and shall be so constructed and arranged that one square rests directly above the other. The upper tiers shall stand on a continuous row of steel plates/gratings laid across the next lower tier, and shall be nailed down or otherwise secured to prevent displacement.

(e) Horse scaffolds.

(1) Scaffolds shall not be constructed or

arranged more than two tiers or 10 feet (3.0 m) in height, whichever is less.

(2) When horses are arranged in tiers, each horse shall be placed directly over the horse in the tier below.

(3) When horses are arranged in tiers, the legs of each horse shall be nailed down or otherwise secured to prevent displacement.

(4) When horses are arranged in tiers, each tier shall be cross braced.

(f) Form scaffolds and carpenters' bracket scaffolds.

(1) Each bracket shall be attached to the supporting formwork or structure by means of one or more of the following:

A metal stud attachment device; welding; hooking over a secured structural supporting member, with the form wales either bolted to the form or secured by snap ties or tie bolts extending through the form and securely anchored; or, for carpenters' bracket scaffolds only, by a bolt extending through to the opposite side of the structure's wall.

(2) Metal bracket-form scaffolds shall be an integral part of the form panel.

(3) Folding type metal brackets, when extended for use, shall be either bolted or secured with a locking-type pin.

(g) Roof bracket scaffolds.

(1) Scaffold brackets shall be constructed to fit the pitch of the roof and shall provide a level support for the platform.

(2) Brackets (including those provided with pointed metal projections) shall be anchored in place by nails unless it is impractical to use nails. When nails are not used, brackets shall be secured in place with first-grade manila rope of at least three-fourth inch (1.9 cm) diameter, or equivalent.

(i) Outrigger scaffolds.

(1) The inboard end of outrigger beams, measured from the fulcrum point to the extreme point of anchorage, shall be not

less than one and one-half times the out- board end in length.

(2) Outrigger beams fabricated in the shape of an I-beam or channel shall be placed so that the web section is vertical.

(3) The fulcrum point of outrigger beams shall rest on secure bearings at least 6 inches (15.2 cm) in each horizontal dimension.

(4) Outrigger beams shall be secured in place against movement, and shall be securely braced at the fulcrum point against tipping.

(5) The inboard ends of outrigger beams. shall be securely anchored either by means of braced struts bearing against sills in contact with the overhead beams or ceiling, or by means of tension members secured to the floor joists underfoot, or by both.

(6) The entire supporting structure shall be securely braced to prevent any horizontal movement.

(7) To prevent their displacement, platform units shall be nailed, bolted, or otherwise secured to outriggers.

(8) Scaffolds and scaffold components shall be designed by a registered professional engineer and shall be constructed and loaded in accordance with such design.

(j) Pump jack scaffolds.

(1) Pump jack brackets, braces, and accessories shall be fabricated from metal plates and angles. Each pump jack bracket shall have two positive gripping mechanisms to prevent any failure or slippage.

(2) Poles shall be secured to the structure by rigid triangular bracing or equivalent at the bottom, top, and other points as necessary. When the pump jack has to pass bracing already installed, an additional brace shall be installed approximately 4 feet (1.2 m) above the brace to be passed, and shall be left in place until the pump jack has been moved and the original brace reinstalled.

(3) When guardrails are used for fall protection, a workbench may be used as the top rail only

(4) Work benches shall not be used as scaffold platforms.

(k) Ladder jack scaffolds.

- (1) Platforms shall not exceed a height of 20 feet (6.1 m).
- (2) All ladders used to support ladder jack scaffolds shall meet the requirements of subpart X of this part— Stairways and Ladders, except that job-made ladders shall not be used to support ladder jack scaffolds.
- (3) The ladder jack shall be so designed and constructed that it will bear on the side rails and ladder rungs or on the ladder rungs alone. If bearing on rungs only, the bearing area shall include a length of at least 10 inches (25.4 cm) on each rung.
- (4) Ladders used to support ladder jacks shall be placed, fastened, or equipped with devices to prevent slipping.
- (5) Scaffold platforms shall not be bridged one to another.

(l) Window jack scaffolds.

- (1) Scaffold shall be securely attached to the window opening.
- (2) Scaffolds shall be used only for the purpose of working at the window opening through which the jack is placed.
- (3) Window jack shall not be used to support steel plates/gratings placed between one window jack and another, or for other elements of scaffolding.

(m) Crawling boards (chicken ladders).

- (1) Crawling boards shall extend from the roof peak to the eaves when used in connection with roof construction, repair, or maintenance.
- (2) Crawling boards shall be secured to the roof by ridge hooks or by means that meet equivalent criteria (e.g., strength and durability).

(n) Step, platform, and trestle ladder scaffolds.

- (1) Scaffold platforms shall not be placed any higher than the second highest rung or step of the ladder supporting the platform.
- (2) All ladders used in conjunction with step, platform and trestle ladder scaffolds shall meet the pertinent requirements of subpart X of this part— Stairways and Ladders, except that job-made ladders shall not be used to support such scaffolds.
- (3) Ladders used to support step, platform, and trestle ladder scaffolds shall be placed, fastened, or equipped with devices to prevent slipping.
- (4) Scaffolds shall not be bridged one to another.

(o) Single-point adjustable suspension scaffolds.

- (1) When two single-point adjustable suspension scaffolds are combined to form a two-point adjustable suspension scaffold, the resulting two-point scaffold shall comply with the requirements for two-point adjustable suspension scaffolds in paragraph (p) of this section.
- (2) The supporting rope between the scaffold and the suspension device shall be kept vertical unless all of the following conditions are met:
 - (i) The rigging has been designed by a qualified person, and
 - (ii) The scaffold is accessible to rescuers, and
 - (iii) The supporting rope is protected to ensure that it will not chafe at any point where a change in direction occurs, and
 - (iv) The scaffold is positioned so that swinging cannot bring the scaffold into contact with another surface.
- (3) Boatswains' chair tackle shall consist of correct size ball bearings or bushed blocks containing safety hooks and properly "eye-spliced" minimum five-eighth (5 $\frac{1}{8}$) inch

(1.6 cm) diameter first-grade manila rope, or other rope which will satisfy the criteria (e.g., strength and durability) of manila rope.

(4) Boatswains' chair seat slings shall be reeved through four corner holes in the seat; shall cross each other on the underside of the seat; and shall be rigged so as to prevent slippage which could cause an out-of-level condition.

(5) Boatswains' chair seat slings shall be a minimum of five-eighth (5/8) inch (1.6 cm) diameter fiber, synthetic, or other rope which will satisfy the criteria (e.g., strength, slip resistance, durability, etc.) of first grade manila rope.

(6) When a heat-producing process such as gas or arc welding is being conducted, boatswains' chair seat slings shall be a minimum of three-eighth (3/8) inch (1.0 cm) wire rope.

(p) Two-point adjustable suspension scaffolds (swing stages).

The following requirements do not apply to two-point adjustable suspension scaffolds used as masons' or stonesetters' scaffolds. Such scaffolds are covered by paragraph (q) of this section.

(1) Platforms shall not be more than 36 inches (0.9 m) wide unless designed by a qualified person to prevent unstable conditions.

(2) The platform shall be securely fastened to hangers (stirrups) by U-bolts or by other means

(3) The blocks for fiber or synthetic ropes shall consist of at least one double and one single block. The sheaves of all blocks shall fit the size of the rope used.

(4) Platforms shall be of the ladder-type, steel plates/gratings-type, beam-type, or light-metal type.

Light metal-type platforms having a rated capacity of 750 pounds or less and platforms 40 feet (12.2 m) or less in length shall be tested and listed by a nationally recognized testing laboratory.

(5) Two-point scaffolds shall not be bridged or otherwise connected one to another during raising and lowering operations unless the bridge connections are articulated (attached), and the hoists properly sized.

(6) Passage may be made from one platform to another only when the platforms are at the same height, are abutting, and walk-through stirrups specifically designed for this purpose are used.

(q) Multi-point adjustable suspension scaffolds, stonesetters' multi-point adjustable suspension scaffolds, and masons' multi-point adjustable suspension scaffolds.

(1) When two or more scaffolds are used they shall not be bridged one to another unless they are designed to be bridged, the bridge connections are articulated, and the hoists are properly sized.

(2) If bridges are not used, passage may be made from one platform to another only when the platforms are at the same height and are abutting.

(3) Scaffolds shall be suspended from metal outriggers, brackets, wire rope slings, hooks, or means that meet equivalent criteria (e.g., strength, durability).

(r) Catenary scaffolds.

(1) No more than one platform shall be placed between consecutive vertical pick-ups, and no more than two platforms shall be used on a catenary scaffold.

(2) Platforms supported by wire ropes shall have hook-shaped stops on each end of the platforms to prevent them from slipping off the wire ropes. These hooks shall be so

placed that they will prevent the platform from falling if one of the horizontal wire ropes breaks.

(3) Wire ropes shall not be tightened to the extent that the application of a scaffold load will overstress them.

(4) Wire ropes shall be continuous and without splices between anchors.

(s) Float (ship) scaffolds.

(1) The platform shall be supported by a minimum of two bearers, each of which shall project a minimum of 6 inches (15.2 cm) beyond the platform on both sides. Each bearer shall be securely fastened to the platform.

(2) Rope connections shall be such that the platform cannot shift or slip.

(3) When only two ropes are used with each float:

(i) They shall be arranged so as to provide four ends which are securely fastened to overhead supports.

(ii) Each supporting rope shall be hitched around one end of the bearer and pass under the platform to the other end of the bearer where it is hitched again, leaving sufficient rope at each end for the supporting ties.

(t) Interior hung scaffolds.

(1) Scaffolds shall be suspended only from the roof structure or other structural member such as ceiling beams.

(2) Overhead supporting members (roof structure, ceiling beams, or other structural members) shall be inspected and checked for strength before the scaffold is erected. (3) Suspension ropes and cables shall be connected to the overhead supporting members by shackles, clips, thimbles, or other means that meet equivalent criteria (e.g., strength, durability).

(u) Needle beam scaffolds.

(1) Scaffold support beams shall be installed

on edge.

(2) Ropes or hangers shall be used for supports, except that one end of a needle beam scaffold may be supported by a permanent structural member.

(3) The ropes shall be securely attached to the needle beams.

(4) The support connection shall be arranged so as to prevent the needle beam from rolling or becoming displaced.

(5) Platform units shall be securely attached to the needle beams by bolts or equivalent means. Cleats and overhang are not considered to be adequate means of attachment.

(v) Multi-level suspended scaffolds.

(1) Scaffolds shall be equipped with additional independent support lines, equal in number to the number of points supported, and of equivalent strength to the suspension ropes, and rigged to support the scaffold in the event the suspension rope(s) fail.

(2) Independent support lines and suspension ropes shall not be attached to the same points of anchorage.

(3) Supports for platforms shall be attached directly to the support stirrup and not to any other platform.

(w) Mobile scaffolds.

(1) Scaffolds shall be braced by cross, horizontal, or diagonal braces, or combination thereof, to prevent racking or collapse of the scaffold and to secure vertical members together laterally so as to automatically square and align the vertical members. Scaffolds shall be plumb, level, and squared. All brace connections shall be secured.

(i) Scaffolds constructed of tube and coupler components shall also comply with the requirements of paragraph (b) of this section;

(ii) Scaffolds constructed of fabricated frame components shall also comply with the

requirements of paragraph (c) of this section.

(2) Scaffold casters and wheels shall be locked with positive wheel and/or wheel and swivel locks, or equivalent means, to prevent movement of the scaffold while the scaffold is used in a stationary manner.

(3) Manual force used to move the scaffold shall be applied as close to the base as practicable, but not more than 5 feet (1.5 m) above the supporting surface.

(4) Power systems used to propel mobile scaffolds shall be designed for such use. Forklifts, trucks, similar motor vehicles or add-on motors shall not be used to propel scaffolds unless the scaffold is designed for such propulsion systems.

(5) Scaffolds shall be stabilized to prevent tipping during movement.

(6) Employees shall not be allowed to ride on scaffolds unless the following conditions exist:

(i) The surface on which the scaffold is being moved is within 3 degrees of level, and free of pits, holes, and obstructions;

(ii) The height to base width ratio of the scaffold during movement is two to one or less.

(iii) Outrigger frames, when used, are installed on both sides of the scaffold;

(iv) When power systems are used, the propelling force is applied directly to the wheels, and does not produce a speed in excess of 1 foot per second (0.3 m/s); and **(v)** No employee is on any part of the scaffold which extends outward beyond the wheels, casters, or other supports.

(7) Platforms shall not extend outward beyond the base supports of the scaffold unless outrigger frames or equivalent devices are used to ensure stability.

(8) Where leveling of the scaffold is neces-

sary, screw jacks or equivalent means shall be used.

(9) Caster stems and wheel stems shall be pinned or otherwise secured in scaffold legs or adjustment screws.

(10) Before a scaffold is moved, each employee on the scaffold shall be made aware of the move.

(x) Repair bracket scaffolds.

(1) Brackets shall be secured in place by at least one wire rope at least 1/2 inch (1.27 cm) in diameter.

(2) Each bracket shall be attached to the securing wire rope (or ropes) by a positive locking device capable of preventing the unintentional detachment of the bracket from the rope, or by equivalent means.

(3) Each bracket, at the contact point between the supporting structure and the bottom of the bracket, shall be provided with a shoe (heel block or foot) capable of preventing the lateral movement of the bracket.

(4) Platforms shall be secured to the brackets in a manner that will prevent the separation of the platforms from the brackets and the movement of the platforms or the brackets on a completed scaffold.

(5) When a wire rope is placed around the structure in order to provide a safe anchorage for personal fall arrest systems used by employees erecting or dismantling scaffolds, the wire rope shall meet the requirements of subpart M of this part, but shall be at least 5/16 inch (0.8 cm) in diameter.

(6) Each wire rope used for securing brackets in place or as an anchorage for personal fall arrest systems shall be protected from damage due to contact with edges, corners, protrusions, or other discontinuities of the supporting structure or scaffold components.

(7) Tensioning of each wire rope used for securing brackets in place or as an anchorage for personal fall arrest systems shall be by means of a turnbuckle at least 1 inch

(2.54 cm) in diameter, or by equivalent means.

(8) Each turnbuckle shall be connected to the other end of its rope by use of an eyesplice thimble of a size appropriate to the turnbuckle to which it is attached.

(9) U-bolt wire rope clips shall not be used on any wire rope used to secure brackets or to serve as an anchor for personal fall arrest systems.

(10) The employer shall ensure that materials shall not be dropped to the outside of the supporting structure.

(11) Scaffold erection shall progress in only one direction around any structure.

(y) Stilts. Stilts, when used, shall be used in accordance with the following requirements:

(1) An employee may wear stilts on a scaffold only if it is a large area scaffold.

(2) When an employee is using stilts on a large area scaffold where a guardrail system is used to provide fall protection, the guardrail system shall be increased in height by an amount equal to the height of the stilts being used by the employee.

(3) Surfaces on which stilts are used shall be flat and free of pits, holes and obstructions, such as debris, as well as other trip- ping and falling hazards.

(4) Stilts shall be properly maintained. Any alteration of the original equipment shall be approved by the manufacturer.

1. General Guidelines and Tables

Maximum intended nominal load (Kg/m ²)	Maximum permissible span
122.....	10
244.....	8
366.....	6

(a) Fabricated steel platforms may be used in lieu of steel plates/gratings. Maximum spans for such units shall be as recommended by the manufacturer based on the maximum intended load being calculated as follows

Rated load capacity	Intended load
Light-duty	<ul style="list-style-type: none"> • 122 Kg/m² applied uniformly over the entire span area
Medium-duty	<ul style="list-style-type: none"> • 244 Kg/m² applied uniformly over the entire span area.
Heavy-duty	<ul style="list-style-type: none"> • 366 Kg/m² applied uniformly over the entire span area.
One-person	<ul style="list-style-type: none"> • 113.4 Kg placed at the center of the span (total 113.4 Kg).
Two-person	<ul style="list-style-type: none"> • 113.4 Kg placed 18 inches (0.46 m) to the left and right of the center of the span (total 226.8 Kg).
Three-person	<ul style="list-style-type: none"> • 113.4 Kg placed at the center of the span and 113.4 Kg placed 18 inches (0.46 m) to the left and right of the center of the span (total 340.2 Kg).

Note: Platform units used to make scaffold platforms intended for light-duty use shall be capable of supporting at least 122 Kg/m² applied uniformly over the entire unit-span area, or a 113.4 Kg point load placed on the unit at the center of the span, whichever load produces the greater

shear force.

(b) Guardrails shall be as follows:

(i) Top rails shall be equivalent in strength to

1 1/4 inch × 1/8 inch structural angle iron; or 1 inch × .070 inch wall steel tubing; or 1.990 inch × .058 inch wall aluminum tubing.

- (ii)** Midrails shall be equivalent in strength to 1 1/4 inch x 1 1/4 inch x 1/8 inch structural angle iron; or 1 inch x .070 inch wall steel tubing; or 1.990 inch x .058 inch wall aluminum tubing.
- (iii)** Toeboards shall be equivalent in strength to 1 1/4 inch x 1 1/4 inch structural angle iron; or 1 inch x .070 inch wall steel tubing; or 1.990 inch x .058 inch wall aluminum tubing.
- (iv)** Posts shall be equivalent in strength to 1 1/4 inch x 1 1/4 inch x 1/8 structural angle

iron; or 1 inch x .070 inch wall steel tubing; or 1.990 inch x .058 inch wall aluminum tubing.

(v) Distance between posts shall not exceed 8 feet (2.44 m).

(c) Overhead protection shall consist of 2-inch nominal steel plates

(d) Screens installed between toeboards and midrails or top rails shall consist of No. 18 gauge wire one inch mesh.

Tube and coupler scaffolds.

MINIMUM SIZE OF MEMBERS			
	Light duty	Medium duty	Heavy duty
Maximum intended load	122 Kg/m ²	244 Kg/m ²	366 Kg/m ² .
Posts, runners and braces	Nominal 2 in. (1.90 inches) OD. steel tube or pipe.	Nominal 2 in. (1.90 inches) OD steel tube or pipe.	Nominal 2 in. (1.90 inches) OD steel tube or pipe. .
Bearers	Nominal 2 in. (1.90 inches) OD steel tube or pipe and a maximum post spacing of 4 ft. x 10 ft.	Nominal 2 in. (1.90 inches) OD steel tube or pipe and a maximum post spacing of 4 ft. x 7 ft..... Nominal 2 1/2 in. (2.375 in.) OD steel tube or pipe and a maximum post spacing of 6 ft. x 8 ft.*.	Nominal 2 1/2 in. (2.375 in.). OD steel tube or pipe and a maximum post spacing of 6 ft. x 6 ft.
Maximum runner spacing vertically	6 ft. 6 in	6 ft. 6 in.....	6 ft. 6 in.

* Bearers shall be installed in the direction of the shorter dimension.

Note: Longitudinal diagonal bracing shall be installed at an angle of 45° (±5°).

	MAXIMUM NUMBER OF PLATFORM LEVELS			Maximum height of scaffold (in m)
	Light duty	Medium duty	Heavy duty	
Number of Working Levels:				
1 16 11 6	38.1
2 11 1 0	38.1
3 6 0 0	38.1
4 1 0 0	38.1

SCAFFOLDING PARTS AND ERECTION PROCEDURE

(TUBE & CLAMP)

SEPTEMBER 2023

Lay out the mudsills at approximate centers and place base plates on them. The bearer is the name for the tube goes across the scaffold that the boards rest on. The runner goes down the length of the scaffold. Lay these out and stand up the first post. Clamp the runner to the post close to the base. Clamp the bearer on at 90 degrees on top of the runner.

After the first post is upright and runner and bearer attached, the scaffold will be self supporting. Next, attach the other posts at predetermined centers. The bearer always goes on top of the runner for a safety clamp backup effect.

After all four posts are attached, measure the scaffold from inside to inside to insure the corner angles are at 90 degrees (square).

It is a good idea to attach a horizontal diagonal at this time to ensure that the scaffold remains square. Make sure the legs are level and plumb as you go.

After ensuring the first level is properly spaced, square, plumb, and level, you may begin the second level. It is best to have the clamp spacing preset on the horizontal tubes by measuring the spacing with a tape measure. Do not exceed 6'6" to this second level.

Attach the second level bearers and runners. Next, attach the diagonals. Swivel clamps are used to attach these at an approximate 45 degree angle from level to level. All four sides should have diagonal bracing attached.

Put the steel plates/gratings for the second level on the bearers. Once the erector climbs to the second level, he will be exposed to a fall hazard and precautions to be taken

Attach a ladder for access to the second level. Install the guardrails, midrails, and toeboards. Secure the steel plates/gratings to the bearer.

The completed scaffold should be square, rigid, properly diagonally braced, ladders should extend at least to top of handrails, work platforms fully covered with steel plates/gratings, toeboards installed, screening attached where required, guardrails & midrails installed, and all other safety measures met.

PARTS

The right angle clamp attaches tubes at 90 degrees.

The swivel clamp attaches tubes at various angles. It is used for diagonal braces.

SCAFFOLD CHECKLIST

Location (Plant):		Purpose of Scaffold:	Erected by (Dept./Contractor):	
PARTS		POINTS TO BE CHECKED	<input checked="" type="checkbox"/>	REMARKS
Sill plate		Provided on level ground		
Base plate		5" base plate/24" extension base plate/24" screw jack		
		Caster wheels with brake for mobile scaffold		
		Swivel base plate for uneven or angled surface		
Tubes		Uniform/Proper size		
		Straight		
Standard (Post)		Staggered joints (adjacent standards are not joined within the same lift level to prevent tipping)		
		Sleeve couplers (to join two standards (tube type) end to end)		
		Vertical		
Ledger (Runner)		Staggered joints		
		Level		
		Not damaged		
		Bearer placed on top of Ledger		
Bracing		Longitudinal diagonal bracing		
		Transverse diagonal bracing		
		Bracing repeated at every 5 th post		
Ladders		Proper angle (75°) or 1:4 base to height ratio		
		Right length		
		Properly secured/Ladder clamp		
		Separate landing		
		Right extension		
Fittings		Right fittings		
		Not damaged		
		Right angle clamps for Bearer and Ledger (tube type)		
Fall protection		Top rail		
		Mid rail		
		Toe guard (Falling object protection)		
Boards (Steel plates/gratings)		Not damaged		
		Not loose		
		Right support
