**CLEANING OF HOT OIL HEATER TUBES, PREPARATION FOR NDT, IN-SITU METALLOGRAPHY &  
HYDROTEST OF TUBES COILS IN POSITION**

***THIS DOCUMENT TO BE SIGNED AND STAMPED BY BIDDER ON ALL PAGES AND SUBMITTED ALONG  
WITH THE E-TENDER***

**General instructions for Online Bid Submission**

The bidders are required to submit soft copies of their bids electronically on the Central Public Procurement Portal(Govt. Of India), using valid [Digital Signature Certificates](#). The instructions given below are meant to assist the bidders in registering on the CPP Portal, prepare their bids in accordance with the requirements and submitting their bids online on the CPP Portal.

More information useful for submitting online bids on the CPP Portal may be obtained at:  
<https://eprocure.gov.in/eprocure/app>.

**REGISTRATION**

1. Bidders are required to enrol on the e-Procurement module of the Central Public Procurement Portal (URL: <https://eprocure.gov.in/eprocure/app>) by clicking on the link “**Online bidder Enrolment**” on the CPP Portal which is [free of charge](#).
2. As part of the enrolment process, the bidders will be required to choose a unique username and assign a password for their accounts.
3. Bidders are advised to register their valid email address and mobile numbers as part of the registration process. These would be used for any communication from the CPP Portal.
4. Upon enrolment, the bidders will be required to register their valid Digital Signature Certificate (Class III Certificates with signing key usage) issued by any Certifying Authority recognized by CCA India (e.g. Sify / nCode / eMudhra etc.), with their profile.
5. Only one valid DSC should be registered by a bidder. Please note that the bidders are responsible to ensure that they do not lend their DSC's to others which may lead to misuse.
6. Bidder then logs in to the site through the secured log-in by entering their user ID / password and the password of the DSC / e-Token.

**SEARCHING FOR TENDER DOCUMENTS**

1. There are various search options built in the CPP Portal, to facilitate bidders to search active tenders by several parameters. These parameters could include Tender ID, Organization Name, Location, Date, Value, etc. There is also an option of advanced search for tenders, wherein the bidders may combine a number of search parameters such as Organization Name, Form of Contract, Location, Date, Other keywords etc. to search for a tender published on the CPP Portal.

2. Once the bidders have selected the tenders they are interested in, they may download the required documents / tender schedules. These tenders can be moved to the respective 'My Tenders' folder. This would enable the CPP Portal to intimate the bidders through SMS / e-mail in case there is any corrigendum issued to the tender document.
3. The bidder should make a note of the unique Tender ID assigned to each tender, in case they want to obtain any clarification / help from the Helpdesk.

#### **PREPARATION OF BID**

1. Bidder should take into account any corrigendum published on the tender document before submitting their bids.
2. Please go through the tender advertisement and the tender document carefully to understand the documents required to be submitted as part of the bid. Please note the number of covers in which the bid documents have to be submitted, the number of documents - including the names and content of each of the document that need to be submitted. Any deviations from these may lead to rejection of the bid.
3. Bidder, in advance, should get ready the bid documents to be submitted as indicated in the tender document / schedule and generally, they can be in PDF / XLS / RAR / DWF/JPG formats. Bid documents may be scanned with 100 dpi with black and white option which helps in reducing size of the scanned document.
4. To avoid the time and effort required in uploading the same set of standard documents which are required to be submitted as a part of every bid, a provision of uploading such standard documents (e.g. PAN card copy, annual reports, auditor certificates etc.) has been provided to the bidders. Bidders can use "My Space" or "Other Important Documents" area available to them to upload such documents. These documents may be directly submitted from the "My Space" area while submitting a bid, and need not be uploaded again and again. This will lead to a reduction in the time required for bid submission process.

**Note:** My Documents space is only a repository given to the Bidders to ease the uploading process. If Bidder has uploaded his Documents in My Documents space, this does not automatically ensure these Documents being part of Technical Bid.

#### **SUBMISSION OF BIDS**

1. Bidder should log into the site well in advance for bid submission so that they can upload the bid in time i.e. on or before the bid submission time. Bidder will be responsible for any delay due to other issues.
2. The bidder has to digitally sign and upload the required bid documents one by one as indicated in the tender document.
3. Bidder has to select the payment option as "offline" to pay the tender fee / EMD as applicable and enter details of the instrument.
4. Bidder should prepare the EMD as per the instructions specified in the tender document. The original should be posted/couriered/given in person to the concerned official, latest by the last date of bid submission or as specified in the tender documents. The details of the DD/any other accepted instrument, physically sent, should tally with the details available in the scanned copy and the data entered during bid submission time. Otherwise the uploaded bid will be rejected.

5. Bidders are requested to note that they should necessarily submit their financial bids in the format provided and no other format is acceptable. If the price bid has been given as a standard BoQ format with the tender document, then the same is to be downloaded and to be filled by all the bidders. Bidders are required to download the BoQ file, open it and complete the white coloured (unprotected) cells with their respective financial quotes and other details (such as name of the bidder). No other cells should be changed. Once the details have been completed, the bidder should save it and submit it online, without changing the filename. If the BOQ file is found to be modified by the bidder, the bid will be rejected.
6. The server time (which is displayed on the bidders' dashboard) will be considered as the standard time for referencing the deadlines for submission of the bids by the bidders, opening of bids etc. The bidders should follow this time during bid submission.
7. All the documents being submitted by the bidders would be encrypted using PKI encryption techniques to ensure the secrecy of the data. The data entered cannot be viewed by unauthorized persons until the time of bid opening. The confidentiality of the bids is maintained using the secured Socket Layer 128 bit encryption technology. Data storage encryption of sensitive fields is done. Any bid document that is uploaded to the server is subjected to symmetric encryption using a system generated symmetric key. Further this key is subjected to asymmetric encryption using buyers/bid opener's public keys. Overall, the uploaded tender documents become readable only after the tender opening by the authorized bid openers.
8. The uploaded tender documents become readable only after the tender opening by the authorized bid openers.
9. Upon the successful and timely submission of bids (i.e. after Clicking "Freeze Bid Submission" in the portal), the portal will give a successful bid submission message & a bid summary will be displayed with the bid no. and the date & time of submission of the bid with all other relevant details.
10. The bid summary has to be printed and kept as an acknowledgement of the submission of the bid. This acknowledgement may be used as an entry pass for any bid opening meetings.

#### **ASSISTANCE TO BIDDERS**

1. Any queries relating to the tender document and the terms and conditions contained therein should be addressed to the Tender Inviting Authority for a tender or the relevant contact person indicated in the tender.
2. Any queries relating to the process of online bid submission or queries relating to CPP Portal in general may be directed to the 24x7 CPP Portal Helpdesk.

**CLEANING OF HOT OIL HEATER TUBES, PREPARATION FOR NDT, IN-SITU METALLOGRAPHY & HYDROTEST OF TUBES COILS IN POSITION**

***THIS DOCUMENT TO BE SIGNED AND STAMPED BY BIDDER ON ALL PAGES AND SUBMITTED ALONG WITH THE E-TENDER***

**SCOPE OF WORK**

The scope of work shall include, but not limited to the following

**1. CLEANING OF HOT OIL HEATER TUBES**

Opening all the doors of Hot Oil Furnace by removing the loose refractory bricks and keeping them in a safe location as instructed by Engineer in charge. Erection of “Steel” scaffolding/platform required for cleaning and inspection/of Furnace /In-situ Metallographic/repairs if any and removal of the same after the NDT/inspection and In-situ Metallography. The scaffolding/ platform to be erected without damaging the refractory lining inside the furnace.

- Cleaning the furnace tubes (outside) and making it ready for inspection as per the instruction of Engineer-in-Charge and should be completed within 5 days from the date of intimation to start the work.
- Assisting the inspecting team engaged in the inspection of the equipment/tubes.
- Opening of all Man ways and inspection doors provided in the Convection Section (North Side)
- All steel scaffolding should be retained till the end of all works by Third Party/HOCL, which will go for 20 - 30 days approximately.
- Opening of off take duct man way (2 Nos.), breaching access doors (2 Nos.), Chimney bottom door and collection of carbon soot and other materials of chimney just above studded tubes (at header top) and bringing it down to the ground.
- Thorough cleaning and removal of carbon at the top portion of studded tubes as per the instruction of Engineer-in-Charge and bring the removed carbon (soot) down to the ground.
- The removed soot / residue / deposits shall be collected in water proof bags, weighed and kept in a location as instructed by the Engineer-in-Charge.
- Any other jobs connected with inspection, cleaning and boxing up of the heater.

- The scrap etc. removed after cleaning, NDT/ inspection/In-situ Metallography shall be weighed and kept at a location as instructed by the Engineer-in-Charge.
- Final cleaning of the heater/floor furnace area and placing of refractory loose bricks in its place before final boxing up of the heater.

## **2. BUFFING OF HOT OIL HEATER TUBES**

- Cleaning of all weld joints of Hot Oil Heater tubes (6" & 4") (Both inside furnace & outside in the header box) by buffing to the maximum finish (Base metal finish) to enable us to conduct D.P Test and Thickness/ Hardness testing etc.
- The quality of buffing should be to the satisfaction of Engineer in charge. All manpower, Tools, Tackles, Grinding Machines, Buffing wheels of different grade should be brought by the Contractor.
- HOCL will only provide Electric supply at free of cost. Entire buffing work should be done on round the clock basis and has to be completed within two days from the date of intimation to start the work.
- The work is at an elevation 0 to 25 Mtr. However, the contractor has to bring all PPE (Personal Protective Equipments)for their employees at their cost.

## **3. HYDRO TESTING OF HOT OIL HEATER TUBES (5 LOOPS SEPARATELY)**

- Making all arrangements for draining and hydro testing the Hot Oil Heater Tubes like opening of flanges putting temporary gaskets, blinds, water filling and testing, removing the temporary gaskets, putting new gaskets etc. as per the instruction of Engineer-in-Charge.
- Testing of each loop at the required pressure should be done separately (Five loops).
- Necessary manpower, Pumps, Tools, and Tackles etc. should be brought by Contractor.
- Cutting of temporary gaskets for Hydro testing is in Contractors scope, Gasket sheet will be provided by HOCL, and for final boxing-up, spiral wound gasket graphite filled must be used and that will also be provided by HOCL.
- Calibrated pressure gauge for testing will also be provided by HOCL.
- Steel scaffolding should be provided wherever required, by the Contractor.
- Any other jobs connected with Hydro testing of tubes.

## **4. BUFFING OF TUBES FOR IN-SITU METALLOGRAPHY**

- Cleaning on the tubes by buffing to be maximum finish (base metal finish) for carrying out the In-situ Metallography.
- The locations, where to be buffed will be intimated at the time of execution of In-situ Metallography.
- The dimensions of the spot to be buffed are 2 × 2 inch size.

**5. REMOVAL OF HEADER BOX AT CONVECTION ZONE (EAST & WEST) AND BRINGING DOWN TO GROUND LEVEL FOR INSPECTION AND FIXING BACK WITH GASKET (25 MTR ELEVATION).**

- Removal of the header box covers in both sides (East and West) by unbolting the fasteners, bringing to ground level, cleaning of the header box tubes, buffing of weld joints of U-tubes to enable us to conduct DP, thickness, hardness etc., removal of soot if any, cleaning of the tubes and fixing back the covers using new gaskets. All scaffolding, platform, ladder etc. required for the work has to be arranged and erected by the contractor at his cost and the same shall be retained till the inspection is over.

**NOTE:**

All steel scaffolding and platforms should be retained till the end of the NDT inspection, Refractory work, Third party inspection, In-situ Metallography and any other works as per the instruction of Engineer-in-Charge.

Upon completion of the work, all materials shall be transported to designated locations in HOCL premises and as directed by the Engineer/Officer-In-Charge on daily basis.
